While we have described the risks and uncertainties that our management believes are material, these risks and uncertainties may not be the only risks and uncertainties we face. Additional risks and uncertainties, including those we currently are not aware of or deem immaterial, may also have an adverse effect on our business, results of operations, financial condition and prospects.

- 1. Some events may not be material individually but may be found material collectively.*
- 2. Some events may have material impact qualitatively instead of quantitatively.*
- 3. Some events may not be material at present but may be having material impact in future.*

Note:

The risk factors as envisaged by the management along with the proposals to address the risk if any. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial implication of any of the risks described in this section.

INTERNAL RISK FACTORS

- Our business operations and revenues are entirely dependent on the Indian Railways. Any adverse change in policy of the Ministry of Railways, GOI “MoR” may lead to our contracts being foreclosed, terminated, restructured or renegotiated, which may have a material effect on our business and results of operations.***

Our business operations and revenues are entirely dependent on the policies of the Ministry of Railways and operations of Indian Railways. Our Company has derived a significant portion of its revenues from the Indian Railways and for the Fiscal 2025, 2024 and 2023 the total revenue from Indian Railways was ₹18,219.36, ₹19,194.19 Lakhs and ₹11,807.29 Lakhs, respectively, which represents 86.76%, 89.93% and 86.07% respectively our total revenue.

Our operations involve providing turnkey furnishing solutions for the interiors of new railway coaches, as well as the refurbishment, up gradation, and conversion of existing coaches, including the modernization of toilet facilities and manufacturing and supply of components to railways. Due to any future change in government policy, the Indian Railways may decide to reduce the spending on coaches. If we are not able to continue to receive orders in the manner we have in the past from the Indian Railways, it would have a material adverse effect on our results of operations and financial conditions. In addition, during an economic downturn, many of our competitors may be more inclined to take greater or unusual risks or terms and conditions in a contract that we might not deem as standard market practice or acceptable. As a result, we are subject to the risk of losing new awards to competitors thereby adversely impacting our business growth, financial condition and results of operations.

Our company has started receiving orders from the Public Sector Undertakings (PSU) of Indian Railways and couple of contracts are already on its completion stage. However, if the Indian Railways reduce their volume of business with our Company, including due to an amendment of the relevant policies to favour public sector enterprises, or a withdrawal of the programmes and policies beneficial to the private sector, or if the Indian Railways do not release any new orders, our Company’s business, financial condition, results of operations and prospects may be adversely affected. Any withdrawal or adverse changes in Government policies may lead to adverse impact on our on-going business and could, materially and adversely affect our financial condition, capital expenditure, revenues, development and our business operation

- We depend on the Indian Railways for a significant portion of contracts in our order book which are awarded on a tender basis. There is no assurance that our bids will be accepted and future contracts will be awarded to us by Indian Railways. This may result in an adverse effect on our business growth, financial condition and results of operations.***

Our revenues in the future depend on the acceptance of bids submitted to the Indian Railways. As of August 31, 2025 our order book from the Indian Railways was ₹ 40,208.20 lakh. Our railway related projects are awarded by the Indian Railways through competitive bidding processes and satisfaction of other prescribed pre-qualification criteria. We may not be selected for the projects for which we may have submitted a bid. In selecting contractors, Indian Railways generally limits the tender to contractors, who have pre-qualifications based on several criteria including experience, technological capacity and performance, reputation for quality, safety record, financial strength and bonding capacity and size of previous contracts. Further, once prospective bidders satisfy the prequalification requirements of the tender, the project is usually awarded on the basis of price competitiveness of the bid. The growth of our business mainly depends on our ability to obtain new contracts. While we have, in the past, been awarded a significant number of contracts, we cannot assure you that we will continue to be awarded all such contracts. Some of the new entrants eventually building their credentials may also bid for lower margins and awarded some of the contract.

- There are outstanding legal proceedings involving our Company, our Directors and our Promoters. Any adverse decisions could impact our cash flows and profit or loss to the extent of demand amount, interest and penalty, divert management time and attention and have an adverse effect on our business, prospects, results of operations and financial condition.***

There are outstanding legal proceedings involving our Company, our Directors and our Promoters. For details, see “***Outstanding Litigation and Material Developments***” beginning on page 273 of this Draft Red Herring Prospectus.

4. *We are subject to strict quality requirements and customer inspections, and any failure to comply with quality standards may lead to rework/replacement of existing and future orders and could negatively impact our reputation and our business and results of operations and future prospects.*

We are engaged in the Indian railway rolling stock sector, focusing on the design, manufacture and maintenance of railway coaches interior. We provide turnkey furnishing solutions for the interiors of new railway coaches, refurbishment, up-gradation and conversion of old coaches and up-gradation of toilet facilities within railway coaches, along with manufacturing and supply of components to railways. Given the nature of our products and the sector in which we operate, we believe that our customers have high standards for product quality and delivery schedules. Adherence to quality standards is a critical factor as a defect in products manufactured by our Company or failure to comply with the specifications of our customers may, in turn, lead to the manufacture of faulty end products. This may lead to rework/replacement of supply orders by our customers and at certain instances may impose additional costs in the form of product liability and/or product recall. Any compromise in service quality could result in penalties and jeopardize future railway contract opportunities, posing a significant risk to our long-term business prospects and credibility with key stakeholder. Further our facilities, process and products are exposed to regular inspection by our customers to ensure that their internal standards are appropriately met. Any non-compliance observed during inspection may have an adverse impact on our business, financial condition, results of operations and future prospects.

5. *We depend on a limited number of suppliers for raw materials. Any interruption in the availability of raw materials could adversely impact our operations. Further, any failure by our suppliers to provide raw materials to us on time or at all, or as per our specifications and quality standards could have an adverse impact on our ability to meet our manufacturing and delivery schedules.*

Set out in the table below is the contribution of our top 10 suppliers to total purchases for the fiscal period ended in March 2025, March 2024 and March 2023.

* As certified by Khandelwal Jain & Co., Peer Statutory Auditor, through its certificate dated September 27, 2025.

We are dependent on third-party suppliers for products used in our turnkey solutions; any deviation in the quality, timeliness, or reliability of their deliveries poses a significant risk to our project execution, customer satisfaction, and overall business reputation. We cannot assure that we will be able to get the same quantum and quality of supplies, or any supplies at all, and the loss of supplies from one or more of them may adversely affect our purchases of stock and ultimately our revenue and results of operations. However, the composition and amount of purchase from these suppliers might change as we continue seeking new suppliers for our product for better quality and price in the normal course of business to reduce the dependency on these suppliers, we have already started manufacturing major items or components of passenger train interior such as wall panel, ceiling, toilet module etc. Though we believe that we will not face substantial challenges in maintaining our business relationship with them or finding new suppliers, there can be no assurance that we will be able to maintain long term relationships with such suppliers or find new suppliers in time.

We primarily source our raw materials from domestic third-party suppliers and limited procurement from international sources. In order to have flexibility towards price discovery in the markets, we do not maintain long-term contracts with our suppliers for these raw materials. If we fail to (i) receive the required quality of raw materials; (ii) negotiate favorable financial terms; or (iii) obtain an adequate and timely supply of raw materials or if our principal suppliers discontinue supply, face business disruptions, or become insolvent we may not be able to secure alternate sources in a timely manner. Additionally, if our demand increases or our suppliers face resource shortages, they may be unable to meet our requirements for raw materials. The details of geographical classification of raw materials procured are as follows:-

(Rs. in lakhs)

Particulars	For the year ended		
	March 31, 2025	March 31, 2024	March 31, 2023

- 6. Our business is substantially dependent on our ability to accurately carry out the pre-bidding studies for potential contracts. Any deviation during the execution of the purchase orders as compared to our pre-bid estimates could have a material adverse effect on our cash flows, results of operations and financial condition.**

We carry out the pre-bidding analysis for the potential purchase order considering various elements including financial and technical factors. However, such analysis may not enable us to assure the accuracy of such studies. The accuracy of the pre-bidding studies is dependent on the key elements like preparing requirement of raw materials, adherence to manufacturing processes, complying to quality standards, planning to meet delivery schedules etc. Any deterrence or deviation in the estimation and calculation of the key elements may hamper the quality of the pre-bid analysis relied upon before submitting any tenders. Any deviation during the implementation and operation of the contract as compared to our pre-bid estimates could have a material adverse effect on our cash flows, results of operations and financial condition.

- 7. Our business is subject to seasonal variations and cyclical trends that could result in fluctuations in our results of operations.**

Our business operations are subject to seasonal variations and cyclical trends, particularly in relation to the timing and availability of government tenders and project execution schedules in the railway sector. A significant portion of our revenue is derived from contracts awarded by Indian Railways. The issuance of tenders and the pace of project execution often depend on fiscal budget allocations, administrative approvals, and other external factors beyond our control. These tenders are not issued uniformly throughout the year and may be concentrated in specific periods, particularly towards the second half of the financial year. This may lead to fluctuations in our revenue and profitability across quarters or half yearly periods. Additionally, project execution can be affected by monsoon conditions, logistical delays, or changes in regulatory or policy frameworks, further contributing to uneven revenue recognition. As a result, our financial performance may vary from period to period, and past performance may not be indicative of future results. The following table sets forth the half-yearly sales turnover of our Company for the periods indicated:-

(Rs. in lakhs)

Particular	2024-25		2023-24		2022-23	
	Amount	% of total	Amount	% of total	Amount	% of total
April - September	4,988.41	23.75%	3,845.90	18.02%	2,482.71	18.10%

* As certified by Khandelwal Jain & Co., Peer Statutory Auditor, through its certificate dated September 27, 2025.

8. Our operations are subject to high working capital requirements. If we are unable to generate sufficient cash flows to allow us to make required payments, there may be an adverse effect on our results of operations

Our business requires significant working capital including in connection with our business operations, financing our inventory, providing bank guarantees, purchase of raw materials and our development of new products which may be adversely affected by changes in terms of credit and payment. We are required to maintain a high level of working capital because our business activities are characterized by long product development periods and production cycles. A large amount of our working capital is blocked in availing bank guarantee for our tenders, in trade receivables and inventories. Delays in payment under ongoing purchase orders or reduction of advance payments and/or accelerated payments to suppliers, fixed deposits to facilitate bank guarantees to our customers, could adversely affect our working capital, lower our cash flows and materially increase the amount of working capital to be funded. We may also be unable to adequately finance our working capital requirements on account of various factors, including extraneous factors such as delay in disbursements under our financing arrangements, increased interest rates, insurance or other costs, or borrowing and lending restrictions or finance our working capital requirements on commercially acceptable terms or at all, devolvement of our bank guarantees by our bankers etc. each of which may have a material adverse effect on our business, financial condition, prospects and results of operations. Continued increase in our working capital requirements may have an adverse effect on our financial condition and results of operations. Though the turnkey furnishing & refurbishment contracts awarded by Indian Railways have flexible partial payment conditions which allows any contractor to receive an average 70% of the total per coach payment on supply of the material/items required to execute the work and balance 30% on execution of the work on coach. However, if we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations.

Furthermore, the objects of the Offer include funding working capital requirements of our Company. For more information in relation to such management estimates and assumptions, please see “*Objects of the Offer*” on page 89. Our working capital requirements may be affected due to factors beyond our control including force majeure conditions, delay or default of payment by our clients, non-availability of funding from banks or financial institutions. Accordingly, such working capital requirements may not be indicative of the actual requirements of our Company in the future and investors are advised to not place undue reliance on such estimates of future working capital requirements.

We may be subject to working capital risks due to delays or defaults in payment by clients, which may restrict our ability to procure raw materials and make payments when due. In addition, any delay or failure on our part to supply the required quantity or quality of products, within the time stipulated by our agreements, to our customers may in turn cause delay in payment or refusal of payment by the customer. Such defaults/delays by our customers in meeting their payment obligations to us may have a material effect on our business, financial condition and results of operations.

The working capital requirement for the FY 2023, 2024 and 2025. The working capital gap (WCG) has been met with an increase in the bank borrowing and capital and internal cash Accruals of the Company.

9. Our Company transferred personal assets and unidentified liabilities of M/s Acme India a proprietorship owned by Mr. Suraj Pandey, which does not originally belong to the Company. This may expose the company to unforeseen financial obligations, regulatory and reputational risks

During the acquisition of M/s Acme India, certain assets belonging to the sole proprietorship of Mr. Suraj Pandey including GST credits, Fixed Deposit Receipts (FDRs), TDS receivables, and other similar assets amounting to ₹1,824.72 lakhs were transferred to the Company. Upon review in FY 2022–23 and FY 2023–24, it was determined that these were personal assets of the proprietor and were not intended to be included as part of the Company's business assets. Accordingly, these assets were transferred back to Mr. Suraj Pandey. While this corrective measure was undertaken in good faith, the initial inclusion and subsequent reversal of these assets may raise concerns regarding the accuracy and consistency of the Company's financial statements. Any regulatory scrutiny, audit qualifications, or disputes arising from the treatment of these assets may pose financial and reputational risks to the Company. Furthermore, if such reversals are viewed unfavorably by regulators or stakeholders, it could materially impact the Company's financial position and credibility.

In addition, certain liabilities amounting to ₹3,543.61 lakhs, which were determined to be unrelated to the business acquired and do not form part of business acquisition, have also been reversed back to the original proprietor for discharge at his own end. While these liabilities were not contractually undertaken by the Company, there remains a possibility that creditors may raise disputes regarding the non-transfer of their claims by the Company. Any such disputes or unforeseen claims could result in financial exposure for the Company. The directors have, however, undertaken to indemnify the company against any liability, claim, damages or expenses and shall keep the Company risk averse. Nevertheless, the potential for litigation, settlement, costs and expenses may still indirectly affect the Company's operations.

10. We have had negative cash flows from operating and investing activities in the past. Any negative cash flow in the future may affect our liquidity and financial condition

Our cash flow from our operating and investing activities have been negative in the past. Following are the details of our cash flow position during the last three financial years based on restated consolidated financial statements are:

Particulars	Consolidated		Standalone
	March 31, 2025	March 31, 2024	March 31, 2023
Net Cash flow from/(used in) operating activities	2,397.28	(609.37)	(964.64)
Net Cash flow from/(used in) investing activities	(2,851.95)	(1710.56)	(3,030.08)

(Rs. in lakhs)

For details, please see the chapter titled “**Financial Information of Our Company**” on page 180 of this Draft Red Herring Prospectus. Any negative cash flows in the future could adversely affect our results of operations and consequently our revenues, profitability and growth plans.

11. There are certain discrepancies/errors noticed in some of our corporate records relating to forms filed with the Registrar of Companies and other provisions of Companies Act, 1956/ 2013. Any penalty or action taken by any regulatory authorities in future, for non-compliance with provisions of corporate and other law could impact the reputation and financial position of the Company to that extent.

We manage our regulatory compliance by monitoring and evaluating internal controls to ensure adherence to applicable statutory and regulatory requirements. However, we cannot assure that deficiencies in our filings will not arise in the future or that adequate measures will always be effectively implemented to rectify or mitigate such deficiencies. The Company has identified certain discrepancies in its corporate records and e-forms filed with the Registrar of Companies (“ROC”), including clerical errors in the filing of ADT-1, MGT-7 and in the drafting of Board Reports. Further, the Company has not complied with certain statutory provisions under the Companies Act, 2013, which inter alia include non-filing of Form CHG-1 for creation of charge on certain past loans, constituting non-compliance of Section 77 read with applicable rules and attracting penalty under Section 86 and/or other relevant provisions thereof. However, no such loans are outstanding as on the date of this Draft Red Herring Prospectus. The Company has also had non-compliances under Section 42 relating to allotment of shares in FY 2023-24, for which an adjudication application has been filed in Form GNL-1. In addition, there was a delay in conducting the Annual General Meeting for FY 2023-24 and incorrect filing of AOC-4 for the same period, which also leads to non-filing of Annual Return for FY 2023-24, in respect of which the Company has filed applications for compounding of delay and correction of AOC-4. Further, a loan originally taken by M/s. Acme India (Proprietorship) and subsequently assumed by our Company pursuant to a business acquisition constituted non-compliance with Section 73 of the Companies Act, 2013, as the lender, at the time of the loan and acquisition, was neither a director, relative, nor shareholder. The said loan has since been fully repaid and no such liability exists as on the date of this Draft Red Herring Prospectus. Although no show cause notice has been received in relation to the aforesaid matters, the Company remains committed to ensuring full compliance with applicable laws going forward. To this end, the Company has

appointed a Compliance Officer and strengthened its internal compliance framework. Nonetheless, any penalties that may be imposed by regulatory authorities in connection with such past non-compliances could adversely affect the Company's financial condition to that extent.

12. We do not own our registered office, corporate office, factory and warehouse premises from which we carry out our business activities. In case of non-renewal or termination of rent/lease agreements, or in the event of any dispute in relation to the use of such premises, our business operations and results of operations may be materially and adversely affected.

Our Registered Office and Corporate Office situated at Plot No. 34, 2nd Floor & 3rd Floor, Sector-3, Dwarka, New Delhi-110078 has been taken on lease for a period of 11 months with effect from September 4, 2025, from our Promoter, Suraj Pandey. Our factory unit located at Khasra No. 53/3 & 8, Khewat No. 375, Khata No. 466 and Khewat No. 85, Khata No. 124, Village – Ram Nagar, Tehsil – Gannaur, District – Sonipat, Haryana-131039 has been taken on long term lease for a period of five years with effect from May 1, 2022. Our warehouse located at 2nd & 3rd Floor of Plot No. 85, Matiala Extension, New Delhi-110059 has been taken on rent for 11 months with effect from March 1, 2025. In addition, our new factory unit located at Khewat No. 551/539, 322/313, Killa No. 91/24/1(3-12), 91/16/1(0-6), 16/2(7-6), 17/1(2-16), 17/2(5-04), 24/2/1(4-0), 24/2/2(0-8), 25(7-12), Khata No. 601,356, Akbarpur Barota, Sonipat, Haryana-131103 has been taken on lease for a period of 11 months with effect from August 10, 2025.

In the event of termination/non-renewal of said agreements, we may be required to vacate the said premises which may cause disruption in our inventory management, corporate affairs and business and impede our effective operations which could temporarily impact our business operations until we get suitable alternative premises. For details on the duration of existing rent/lease agreements for our premises, please refer to the section titled “***Our Business***” beginning on page 125 of this Draft Red Herring Prospectus. There can be no assurance that we will, in the future, be able to renew the agreements for the existing locations on same or similar terms, or will be able to find alternate locations for the offices on similar terms favorable to us, or at all. We may also fail to negotiate the renewal of our rent agreements for our premises, either on commercially acceptable terms or at all, which could result in increased rental rates for subsequent renewals or searching of new premises, affecting our financial condition and operations. In the event that the lease/rent agreement is terminated or they are not renewed on commercially acceptable terms, we may suffer a disruption in our manufacturing operations which could materially and adversely affect our business, financial condition and results of operations.

13. Our Order Book may not be representative of our future results and our actual income may be significantly less than the estimates reflected in our Order Book, which could adversely affect our results of operations.

Our Order Book as on a particular date consists of contract value of unexecuted or uncompleted portions of our ongoing projects, i.e., the total contract value of ongoing projects as reduced by the value of projects billed till August 31, 2025. As on August 31, 2025 our Company had an Order Book of ₹ 40,208.20 lakhs, and comprised detail of projects in order book. For further details on our Order Book, see “***Our Business – Order Book***” on page 125 of this Draft Red Herring Prospectus. We may not be able to achieve our expected margins or may even suffer losses on one or more of these contracts or we may not be able to realize the revenues which we anticipated in such projects. In addition, there can be no assurance that we will be awarded the projects that we currently expect or that we will be able to execute agreements for these anticipated projects on terms that are favorable to us or at all.

We may encounter problems executing the projects as ordered or executing it on a timely basis. Moreover, factors beyond our control or the control of our clients may postpone a project or cause its cancellation, including delays or failure to obtain necessary permits, authorizations, permissions, right-of-way, and other types of difficulties or obstructions. Due to the possibility of cancellations or changes in scope and schedule of projects, resulting from our clients' discretion or problems we encounter in project execution or reasons outside our control or the control of our clients, we cannot predict with certainty when, if or to what extent, a project forming part of our Order Book will be performed and this could reduce the income and profits we ultimately earn from the contracts. Delays in the completion of a project can lead to clients delaying or refusing to pay the amount, in part or full, that we expect to be paid in respect of such project. Even relatively short delays or surmountable difficulties in the execution of a project could result in our failure to receive, on a timely basis or at all, all payments otherwise due to us on a project. These payments often represent an important portion of the margin we expect to earn on a project. In addition, even where a project proceeds as scheduled, it is possible that the contracting parties may default or otherwise fail to pay amounts owed. Any delay, reduction in scope, cancellation, execution difficulty, payment postponement or payment default in regard to our Order Book projects or any other uncompleted projects, or disputes with clients in respect of any of the foregoing, could materially harm our cash flow position, revenues and earnings.

14. We require certain approvals, licenses, registrations and permits to operate our business, and failure to obtain or renew them in a timely manner or maintain the statutory and regulatory permits and approvals required to operate our business may adversely affect our operations and financial conditions.

We require certain approvals, licenses, registrations and permits to operate our business, and failure to obtain or renew them in a timely manner or maintain the statutory and regulatory permits and approvals required to operate our business may adversely affect our operations and financial conditions. Except as described below and as mentioned in the chapter titled **“Government and Other Approvals”**, we believe that we have obtained requisite permits and licenses which are adequate to run our business, however we cannot assure that there is no other statutory/regulatory requirement which we are required to comply with. Further, some of these approvals are granted for fixed periods of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. There can be no assurance that the relevant authorities will issue any of such permits or approvals in time or at all. Failure by us to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business, financial condition and results of operations. There can be no assurance that the relevant authorities will issue or renew these approvals or licenses in a timely manner, or at all. In the event of any unanticipated delay in receipt of such approvals, the proposed capacity expansion plan may extend and any such delay could have an adverse impact on our growth, prospects, cash flows and financial condition. The approvals required by our Company are subject to numerous conditions and there can be no assurance that these would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. If there is any failure by us to comply with the applicable regulations or if the regulations governing our business are amended, we may incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer a disruption in our operations, any of which could adversely affect our business.

15. Our Company’s logo and word trademark is not registered as on Draft Red Herring Prospectus. We may be unable to protect our intellectual property against third party infringement or are found to infringe on the intellectual property rights of others, it could have a material adverse effect on our business, result of operations, and financial conditions.

We have not yet registered the trademarks that we are using for the business. We have made an application dated September 03, 2024 under Class “12” under the Trademarks Act of 1999 to register our logo. , which is at “Formalities Chk Pass” stage. Further, we have made an application dated September 18, 2024 under Class “12” under the Trademarks Act of 1999 to register our word trademark “COACHES WITH STYLE AND SAFETY” which is at “Formalities Chk Pass” stage. Our logo and word trademark is significant to our business and operations. The use of our logo and word trademark by third parties could adversely affect our reputation, which could in turn adversely affect our business and results of operations. Obtaining, protecting and defending intellectual property rights can be time consuming and expensive, and may require us to incur substantial costs, including the diversion of the time and resources of management and technical personnel. Further, while we endeavor to ensure that we comply with the intellectual property rights of others, there can be no assurance that we will not face any intellectual property infringement claims brought by third parties that may require us to introduce changes to our operations. Any claims of infringement, regardless of merit or resolution of such claims, could force us to incur significant costs in responding to, defending and resolving such claims, and may divert the efforts and attention of our management and technical personnel away from our business. We could be required to pay third party infringement claims. In such cases, our financial conditions and business operations may be adversely impacted. Please refer to the section titled **“Government and Other Approvals – Intellectual Property Rights”** on page 286 of this Draft Red Herring Prospectus.

16. *Our Subsidiary companies are in a similar line of business as us which may involve conflict of interest, which could adversely impact our business.*

Our Subsidiary Companies namely, ACVI Joint Venture Private Limited and ACME & Vibgyor JV Private Limited holding 51.04% and 51.53% of the equity, are engaged in the similar line of business, as of our Company. Further, we have not entered into any non-compete agreement with the said entity. We cannot assure that our Promoter who has common interest in said entity will not favour the interest of the said entity. As a result, conflicts of interests may arise in allocating business opportunities amongst our Company and our Subsidiary Companies in circumstances where our respective interests' conflict. In cases of conflict, our Promoter may favour other companies/entities in which our Promoter has interest. There can be no assurance that our Promoter or our Subsidiary Companies or members of the Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours.

17. *We are dependent on our Promoters, our senior management and other key personnel, and the loss of, or our inability to attract or retain, such persons could affect our business, results of operations, financial condition and cash flows.*

Our performance also depends largely on the efforts and abilities of our Promoters, senior management and other key personnel, including our Promoters Mr. Suraj Pandey and Mrs. Sadhvi Pandey. They have gained experience in this line of business and have over the years built relations with suppliers, third party service providers, customers, regulators and other persons who are connected with us and have been actively involved in the day to day operations and management, further we believe that the inputs and experience of our senior management, in particular, and other key personnel are valuable for Research and development activities, tender bidding process, procurement of raw materials successful delivery of products and our overall business operations of our Company. For details in relation to the experience of our key management personnel, see "**Our Management**" on page 161 of this Draft Red Herring Prospectus.

We cannot assure you that these individuals or any other member of our senior management team will not leave us or join a competitor or that we will be able to retain such personnel or find adequate replacements in a timely manner, or at all. We may require a long period of time to hire and train replacement personnel when qualified personnel terminate their employment with our Company. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting employees that our business requires. The loss of the services of such persons may have an effect on our business, results of operations, financial condition and cash flows.

18. *The Objects of the Offer for which funds are being raised, are based on our management estimates and any bank or financial institution or any independent agency has not appraised the same. The deployment of funds in the project is entirely at our discretion, based on the parameters as mentioned in the chapter titles "Objects of the Offer"*

The fund requirement and deployment, as mentioned in the "**Objects of the Offer**" on page 89 of this Draft Red Herring Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter "**Objects of the Offer**" is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter "**Objects of the Offer**" will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

19. *A significant portion of our revenue is derived from turnkey furnishing work contracts. Any inability to anticipate or adapt to evolving product upgrades, ensure consistent product quality, or respond to a decline in demand for such products could adversely affect our revenue from operations and hinder our growth prospects.*

A significant portion of our revenue is derived from turnkey furnishing work contracts, contributing 51.59%, 58.52%, and 55.80% of our total revenue from operations for the financial years ended March 31, 2025, 2024, and 2023, respectively. However, in order to mitigate our dependency on the turnkey furnishing work segment, we have also established us in the other segments such as turnkey refurbishment of coach interiors, comprehensive up-gradation of toilet/lavatory of trains. Nevertheless this segment of turnkey furnishing exposes us to various risks, including decline in number of coach production plan by the Indian railways, unanticipated technological advancements leading to more efficient alternatives, fluctuations in raw material prices and availability, changes in regulations or import duties, and broader economic

conditions. Any of these factors could materially impact our revenue, adversely affecting our financial performance and operational results.

20. Information relating to capacity utilization of our manufacturing facilities included in this Draft Red Herring Prospectus is based on various assumptions and estimates. Under-utilization of capacity of our manufacturing facilities and an inability to effectively utilize our manufacturing facilities may have an adverse effect on our business and future financial performance.

Information relating to our capacity utilization of our manufacturing facilities included in this Draft Red Herring Prospectus is based on various assumptions and estimates of our management and independent chartered engineer, namely, Er. Anil Kumar Singh, Chartered Engineers & Appd. Valuers including proposed operations, assumptions relating to availability and quality of raw materials, potential utilization levels and operational efficiencies. For further information regarding our manufacturing facilities, including our historical installed capacity, see “**Our Business - Description of our Business and Operations – Capacity Utilization**” on page 125 of this Draft Red Herring Prospectus. Actual manufacturing volumes and capacity utilization rates may differ significantly from the estimated production capacities of our manufacturing facilities. Undue reliance should therefore not be placed on the information relating to our installed capacities or historical capacity utilization of our manufacturing facilities included in this Draft Red Herring Prospectus.

Our overall capacity utilization for the financial year ended March 31, 2025, March 31, 2024 and March 31, 2023 are as follows:

Note: - As certified by Er. Anil Kumar Singh, Chartered Engineers & Appd. Valuers by his certificate dated September 26, 2025

Further, there is no guarantee that our future production or capacity utilization levels will match or exceed our historical levels. Under-utilization of our manufacturing capacities over extended periods, or significant under-utilization in the short term could increase our cost of production and our operating costs and adversely impact our business, growth prospects and future financial performance. Our expected return on capital invested is subject to, among other factors, the ability to ensure satisfactory performance of personnel to further grow our business, our ability to absorb additional infrastructure costs and utilize the expanded capacities as anticipated. In case of oversupply in the industry or lack of demand, we may not be able to utilize our capacity efficiently.

21. Our Contingent Liability and Commitments could affect our financial position.

Our Contingent liabilities as on March 31, 2025 was ₹7,559.85 lakhs. If these contingent liabilities materialize, fully or partly, the financial condition of our Company could be affected:

For more information, regarding our Contingent Liabilities, please refer “*Annexure XXXIII*” in chapter titled “*Financial Information of the Company*” beginning on page 188 of this Draft Red Herring Prospectus.

22. *We are exposed to the risk of delays or non-payment by our clients and other counterparties, which may also result in cash flow mismatches.*

We are exposed to counterparty credit risk in the usual course of our business dealings with our clients or other counterparties who may delay or fail to make payments or perform their other contractual obligations. As at March 31, 2025, 2024 & 2023, there were outstanding trade receivables of ₹ 15,822.19 lakhs, ₹ 15,377.09 lakhs, and ₹ 7,718.19 lakhs respectively, of which ₹ 986.95 lakhs, ₹ 936.18 lakhs and ₹ 1356.83 lakhs, respectively, represents due outstanding for more than six months. The financial condition of our clients, business partners, suppliers and other counterparties may be affected by the performance of their business which may be impacted by several factors including general economic conditions. We cannot assure you of the continued viability of our counterparties or that we will accurately assess their creditworthiness. We also cannot assure you that we will be able to collect the whole or any part of any overdue payments. Any material non-payment or non-performance by our clients, business partners, suppliers or other counterparties could adversely affect our financial condition, results of operations and cash flows.

23. *An increase in raw material costs or other input costs or loss of any of our suppliers due to delayed payments or otherwise, resulting in shortfall in the supply of our raw material may adversely impact the pricing and supply of our products and have an adverse effect on our business.*

Our operations are impacted by the availability and cost of raw materials utilised in our manufacturing process. Any change in cost and availability of such raw materials for any reason, including change in the approved suppliers, change in law or applicable governmental policies, would adversely affect our business, financial condition, results of operations and prospects. The major raw materials required for manufacturing of our products include seating arrangement, acrylic solid surface, resin, lavatory door, body side window arrangement, honeycomb partition frame and therefore any fluctuation in prices of these materials could affect our profit margins. Our raw material suppliers may fail to deliver products of acceptable quality and within stipulated schedules or at all. We do not have any formal agreements with our vendors/suppliers as we operate on a purchase order system. Due to the absence of any formal contract with our vendors/suppliers, we are exposed to the risks of irregular supplies or no supplies at all or delayed supplies or volatility in the prices of raw materials that we normally procure. We may be required to replace a supplier if the products provided or supplied, do not meet our quality or performance standards. Further, increase in competition may lead to our competitors establishing exclusive arrangements with our suppliers due to which we may be unable to secure an adequate supply of raw materials or which may increase our overall cost of raw materials, which we may not be able to determine from our customers. While we are not significantly dependent on any single raw material supplier, raw material supply and pricing can be volatile due to a number of factors beyond our control, including global demand and supply, economic and political conditions, transportation and labour costs, disruption during transportation, labour unrest, natural disasters etc. This volatility in commodity prices can significantly affect our raw material costs.

Further our Company has outstanding dues of trade payables during fiscal years ended 2025, 2024 and 2023 of ₹ 11,594.40 lakhs, ₹ 8,894.16 lakhs and ₹ 5,711.65 lakhs respectively. Any delay in payment to our creditors may impact our long standing relations with our suppliers and may result in stoppage of timely or at all delivery of raw material. Any such disruption would impact the production and overall financial position of our Company.

24. *The Company has not placed orders of plant & machinery for our proposed object as specified in the Objects of the Offer. Any delay in placing orders, procurement of plant & machinery may delay our implementation schedule and may also lead to increase in price of these plant & machinery and equipment, further affecting our revenue and profitability.*

We intend to use a part of the net proceeds towards funding of capital expenditure towards purchase of additional plant and machinery for usage in the manufacturing unit. For further information, refer “*Objects of the Offer*” on page 89 of this Draft Red Herring Prospectus. Our expansion plans remain subject to the potential problems and uncertainties including cost overruns or delays. Problems that could adversely affect our expansion plans include increased costs of equipment, inadequate performance of the equipment and machinery to be installed at our manufacturing unit, delays in completion, the possibility of unanticipated future regulatory restrictions, delays in receiving governmental, statutory and other regulatory approvals, incremental pre- operating expenses, taxes and duties, interest and finance charges, working capital

margin and other external factors which may not be within the control of our management. There can be no assurance that the proposed expansions will be completed as planned or on schedule, and if they are not completed in a timely manner, or at all, our budgeted costs may be insufficient to meet our proposed capital expenditure requirements. If our actual capital expenditures significantly exceed our budgets, or even if our budgets were sufficient to cover these projects, we may not be able to achieve the intended economic benefits of these projects, which in turn may materially and adversely affect our financial condition, results of operations, cash flows, and prospects. There can be no assurance that we will be able to complete the aforementioned expansion and additions in accordance with the proposed schedule of implementation and any delay could have an adverse impact on our growth, prospects, cash flows and financial condition.

25. Our company executed global tie-ups with multiple entities exposes us to risks of non-renewal, cancellation, or modification of such arrangements, which may adversely impact our business and results of operations.

In line with our future plans and available upcoming opportunities in the Indian railways, we have entered into multiple strategic tie-ups and exclusive collaborations with global entities to introduce as well enter into the existing business of advanced technologies, innovative products, and specialized services to the Indian Railways ecosystem. These long term partnerships are integral to our value proposition, enabling us to enhance safety, improve passenger experiences, and modernize infrastructure. However, such reliance on third-party arrangements exposes us to several risks. For further information, see “**Our Business**” chapter beginning on page 125 of this Draft Red Herring Prospectus.

There can be no assurance that these alliances will continue in the future on the same terms, or at all. Any non-renewal, early termination, or unfavorable modification of these tie-ups whether due to commercial disagreements, changes in strategic priorities, regulatory developments, or geopolitical factors could materially and adversely affect the Company’s business operations, financial performance, and competitive position. In addition, delays or disruptions caused by such global partners, including supply chain issues, non-compliance with local regulations, or failure to meet performance standards, may impair the successful execution of ongoing projects and damage the Company’s reputation.

Furthermore, any negative developments affecting the financial health or operational capability of our global partners may have a direct or indirect impact on the Company. As such, our ability to maintain and grow these relationships is crucial to our long-term success.

26. There are certain delays noticed in some statutory filings with EPFO, ESIC, GST and other statutory authorities. Any Penalty or demand raised by statutory authorities in future may adversely affect our financial position of the Company.

Our Company provide turnkey furnishing solutions for the interiors of new railway coaches, refurbishment, up gradation and conversion of old coaches and up gradation of toilet facilities within railway coaches, which attracts tax liability such as, but not limited to Goods and Service Tax and Income Tax (including dividend distribution tax for dividend payment), etc. as per the applicable provisions of Law. We may also be liable for the payment of the taxes, interest and/or penalty for the previous periods related to taxes which includes Goods and Services tax, Income tax, etc. during assessment pursuant to any conflict of opinion by the assessing officer. We are also required to comply with the provisions such as registration under the labour laws like Provident Fund, ESIC etc. Although, we have taken all the necessary approvals and deposited the required returns and taxes under various applicable Acts.

27. We may encounter delays in the implementation and execution of our orders

We have encountered delays in past in relation to the completion of our orders due to circumstances which were beyond the control of our Company and the client. There may be such delays in the future as well that orders will be completed in the estimated time frame. We cannot assure that all potential liabilities that may arise from delays will be covered or that the damages if any, that may be claimed from customers/third parties for such delay, shall be adequate to cover any loss of profits resulting from such delays. Further, any delay in completing our orders may also result in an increase in the total cost of implementing the contract which could exceed the original estimate or further cost escalation. Such delays and cost overruns will adversely affect our business, cash flows, and results of operations.

28. Our manufacturing activities require deployment of labour and depend on availability of labour. In case of unavailability of such labour, our business operations could be affected.

Our manufacturing operations require deployment and our ability to retain labour. In case such labour workforce is unavailable, or we are unable to identify and retain such labour our business could be adversely affected. We cannot guarantee that we may be able to continue with the same on favorable terms or at all. Any such failure may impact the

operations, business process and profitability. Additionally, there have been amendments in the labour and Employment related laws, which may have a direct impact on our employee costs and consequently, on our margins. Further, latest amendments in labour laws in India may lead to increasing cost of compliance, wages, social security, occupational safety, health and working conditions. We cannot assure you that we will continue to comply with all these labour related laws and that as we continue to grow our business in the future, our labour and employee costs coupled with operating compliances and expenses will not significantly increase.

29. *We have not received NOC from our lender for undertaking the initial public offer of equity shares.*

As on the date of this Draft Red Herring Prospectus, we have not received the NOC for the proposed offer from our lender, namely, IndusInd bank. However, our Company intends to obtain the necessary NOC in relation to the proposed offer from such lender prior to the filing of the Red Herring Prospectus with the RoC, undertaking the proposed offer without obtaining such lender NOC may constitute a default under such loan agreement, which could impact our loan facilities and may have an effect on our financial condition and results of operations.

30. *Our Promoter and Promoter Group members & Group Company has provided personal guarantees for loans availed by our Company. Our business, financial condition, results of operations and cash flows may be adversely affected by the invocation of all or any personal guarantees provided by our Promoter and Promoter Group members and Group Company.*

Our Promoter and Promoter Group Members and Group Company has provided personal guarantees to secure a significant portion of our existing borrowings, and may post listing continue to provide such guarantees and other security. In case of a default under our loan agreements, any of the personal guarantees provided by our Promoter and Promoter Group Members and Group Company may be invoked, which could negatively impact the reputation of our Company. Also, we may face certain impediments in taking decisions in relation to our Company, which in turn would result in a material adverse effect on our financial condition, business, results of operations and prospects and would negatively impact our reputation. In addition, our Promoter and Promoter Group Members and Group Company may be required to liquidate their shareholding in our Company to settle the claims of the lenders, thereby diluting their shareholding in our Company. We may also not be successful in procuring alternate guarantees satisfactory to the lenders, as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows. For further details regarding loans availed by our Company, please refer “*Statement of Financial Indebtedness*” on page no. 258 of this Draft Red Herring Prospectus.

31. *Our insurance coverage may or may not be adequate to protect us against certain operating hazards and this may have a material adverse effect on our business*

Our operations are subject to risks inherent in our operations such as risk of equipment failure, work accidents, fire, earthquakes, flood and other force majeure events, acts of terrorism and explosions including hazards that may cause injury and loss of life, severe damage to and the destruction of property and equipment and environmental damage. Our significant insurance policies consist of, among others, Business Guard Sookshma Package Policy, Bharat Laghu Udyam Surakha Fire Policy, Cargo Insurance Policy, Group Health Insurance, Burglary Insurance Policy, Bundled -Private Car Policy and Auto Secure- Private Car Package Policy. While we believe that we maintain insurance coverage in adequate amounts consistent with size of our business, our insurance policies do not cover all risks, specifically risks such as Keyman Insurance Policy and Burglary insurance policy for our new factory unit located at khewat no 551/539, 322/313, Killa No. 91/24/1(3-12), 91/16/1(0-6), 16/2(7-6), 17/1(2-16), 17/2(5-04), 24/2/1(4-0), 24/2/2(0-8), 25(7-12), Khata No 601,356, Akbarpur Barota, Sonipat, Haryana, 131103. Failure to effectively cover ourselves against the associated risks may potentially lead to material losses. There can be no assurance that our insurance policies will be adequate to cover the losses/ damages suffered or that such insurance coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. If we suffer a significant uninsured loss or if insurance claim in respect of the subject matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected.

32. *Our business is dependent on our manufacturing facilities and we are subject to certain risks in our manufacturing process. Obsolescence, destruction, theft, breakdowns of our major plants or machineries or failures to repair or maintain the same may affect our business, cash flows, financial condition and results of operations.*

We have two manufacturing facilities located at Haryana. Our business is dependent upon our ability to manage our manufacturing facilities, which are subject to various operating risks, including those beyond our control, such as the breakdown and failure of equipment or accidents and severe climate conditions and natural disasters. Any significant malfunction or breakdown of our machinery may entail significant repair and maintenance costs and cause delays in our

operations. If we are unable to repair breakdown of machinery in a timely manner or at all, our operations may need to be suspended until we procure new machinery to replace the same. In addition, we may be required to carry out planned shutdowns of our facilities for maintenance, statutory inspections and testing.

Further, we have recently relocated our manufacturing facility to accommodate business growth and operational expansion. While this move is aimed at enhancing long-term capacity and efficiency, it may temporarily disrupt operations. The relocation process involves setting up new infrastructure, stabilizing supply chains, and onboarding local resources, all of which pose potential risks to production timelines, cost structures, and overall business continuity in the short term.

Obsolescence, destruction, theft or breakdowns of our major plants or machineries may significantly increase our machineries purchase cost and the depreciation of our plants and machineries, as well as change the way our management estimates the useful life of our plants and machineries. In such cases, we may not be able to acquire new plants or machineries or repair the damaged plants or machineries in time or at all. Some of our major machineries or parts may be costly to replace or repair. We may experience significant price increases due to supply shortages, inflation, transportation difficulties or unavailability. Such obsolescence, destruction, theft, breakdowns, repair or maintenance failures or price increases may not be adequately covered by the insurance policies availed by our Company and may have an effect on our business, cash flows, financial condition and results of operations. We cannot assure you that there will not be any disruptions in our operations in the future. Our inability to effectively respond to such events and rectify any disruption, in a timely manner and at an acceptable cost, could lead to the slowdown or shut-down of our operations or underutilization of our manufacturing facilities, which in turn may have an adverse effect on our business, results of operations and financial condition.

33. Compliance with labour law, labour shortage, strikes, work stoppages or increased wage demands by our employees or any other kind of disputes with our employees could adversely affect our business and results of operations.

Our Company is exposed to risks such as compliance with labour law, labour shortage, strikes, work shortage and other industrial actions. Although, we have not experienced any such disputes with our employees, including a strike and other disputes in the past but there can be no assurance that we may not experience disruptions in our operations due to disputes or other problems with our work force such as strikes, work stoppages or increased wage demands in the future. As on August 25, 2025, our Company has 10 full-time employees, including executive directors. Furthermore, we have outsourced the payroll system to a third-party agency in accordance with the service provider agreement dated April 16, 2025, which shall remain in force for a period of three years. In the event of termination or non-renewal of the said agreement, our business operations may be adversely affected due to potential disruptions in payroll processing and administrative functions. Any dispute or other problems with the workforce adversely affect our operations. While presently we enjoy a good relationship with our employees, there can be no assurance that our workmen may not make any further demands. There can be no assurance that we may not experience disruptions in our operations due to disputes or other problems with our work force such as strikes, work stoppages or increased wage demands that may adversely affect our business and results of operations.

34. We could be adversely affected by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

Further, employee's misconduct can give rise to litigation and claims for damages, which could be time-consuming. These claims may also result in negative publicity and adversely impact our reputation and brand name. Further, as per the terms of certain client contracts, we indemnify our clients against losses or damages suffered by our clients as a result of negligent acts of manpower engaged by us. We may also be affected in our operations by the acts of third parties, including sub-contractors and service providers. Any claims and proceedings for alleged negligence as well as regulatory actions may in turn materially and adversely affect our brand and our reputation, and consequently, our business, financial condition, results of operations and prospects.

35. Fraud, theft, employee negligence or similar incidents may adversely affect our results of operations and financial condition.

Our operations may be subject to incidents of theft or damage to inventory. The business may also encounter some inventory loss on account of employee theft, supplier fraud and general administrative error. While we have not experienced

any such instance in the past, there can be no assurance that we will not experience any fraud, theft, employee negligence, security lapse or similar incidents in the future, which could adversely affect our results of operations and financial condition. Though we have insurance losses due to theft, fire or damage caused by other casualties, could adversely affect our results of operations and financial condition.

36. Compliance with, and changes in, safety, health and environmental laws and labour regulations may adversely affect our business, prospects, financial condition and results of operations.

Our operations are subject to central, state and local laws and regulations relating to the protection of the environment and occupational health and safety, including those governing the generation, handling, storage, use, management, transportation and disposal of, or exposure to, environmental pollutants or hazardous materials resulting from our business processes. Due to the nature of our business, along with extensive and increasingly stringent environmental, health and safety laws and regulations, various labour related laws and regulations are also applicable on us.

The scope and extent of new environmental regulations, including their effect on our operations, cannot be predicted and hence the costs and time required to comply with these requirements could be significant. Amendments to such statutes may impose additional provisions to be followed by our Company and accordingly the Company needs to incur clean-up and remediation costs, as well as damages, payment of fines or other penalties, closure of production facilities for non-compliance, other liabilities and related litigation, could adversely affect our business, prospects, financial condition and results of operations.

37. If we are unable to manage our growth effectively or if our estimates or assumptions used in developing our strategic plan are inaccurate or we are unable to execute our strategic plan effectively, our business and prospects may be materially and adversely affected.

Our revenue and our business operations have grown in recent years. Although we plan to continue to expand our scale of operations, we may not be able to sustain these revenue and profit growth in the future periods due to a number of factors, including, among others, our execution capability, our ability to retain, maintain & make new customers, our ability to maintain customer satisfaction, our ability to mobilise sufficient working capital, macroeconomic factors beyond our control such as decline in global economic conditions, competition with other players in the organized and unorganized segments, the greater difficulty of growing at sustained rates from a larger revenue base, our inability to control our expenses and the availability of resources for our growth. There can be no assurance that we will not suffer from capital constraints, operational difficulties or difficulties in expanding existing business operations.

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

38. Our actual results could differ from the estimates and projections used to prepare our financial statements.

The estimates and projections are based on and reflect our current expectations, assumptions and/ or projections as well as our perception of historical trends and current conditions, as well as other factors that we believe are appropriate and reasonable under the circumstances. There can be no assurance that our expectations, estimates, assumptions and/or projections, including with respect to the future earnings and performance will prove to be correct or that any of our expectations, estimates or projections will be achieved.

39. Unsecured loans taken by us may be recalled at any time

Our Company have currently availed unsecured loans which may be recalled by the lenders at any time. As on March 31, 2025, 2024 and 2023, the unsecured loans of our Company that may be recalled at any time by the lenders aggregated to ₹1,909.08, 1,040.90 and 1,598.87 lakhs respectively, which constituted approximately 23.52%, 14.91% and 37.43% of the total indebtedness of our Company. For further details, see “*Statement of Financial Information*” beginning on page 258. In the event that any lender seeks a repayment of any such loan, we would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all.

40. In addition to normal remuneration, other benefits and reimbursement of expenses some of our Directors (Promoters) are interested in our Company to the extent of their shareholding and dividend entitlement.

Some of our Directors (Promoters) are interested in our Company to the extent of their shareholding, dividend entitlement in our Company. For further details, see “***Our Business***” on page 125, in addition to normal remuneration or benefits and reimbursement of expenses. As a result, our directors will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. To enhance our business operations and prospects, our directors and Key Management Personnel are committed to consistently exercising their shareholder rights in the best interest of our Company, positively influencing our business, operational results, and future prospects.

41. Dependence upon transportation services for supply and transportation of our products are subject to various uncertainties and risks, and delays in delivery may result in rejection of products by customer

We do not have an in-house transportation facility and we rely on third party transportation and other logistic facilities at every stage of our business activity including for procurement of products from our suppliers and for transportation of our finished products to our customers. For this purpose, we hire services of transportation companies. However, we have not entered into any definitive agreements with any third-party transport service providers and engage them on a needs basis. Additionally, availability of transportation solutions in the markets we operate in is typically fragmented. The cost of our goods carried by such third-party transporters is typically much higher than the consideration paid for transportation, due to which it may be difficult for us to recover compensation for damaged, delayed or lost goods.

42. We are subject to competition from both organized and unorganized players in the market, which may significantly affect the fixation and realization of the price for our product, which may adversely affect our business operation and financial condition.

The market for our products is highly competitive, with both organized and unorganized players. Key differentiators include product quality, sales and distribution network, pricing, and timely delivery. Some competitors possess greater industry experience, financial resources, and technical capabilities, enabling them to adapt more quickly to changing market conditions. Unorganized sector competitors may offer products at highly competitive prices, potentially affecting our sales volume and growth prospects. Increasing competition could lead to a decline in our market share and margins, negatively impacting our business operations and financial condition. The industry is undergoing rapid consolidation, and the combined strength of larger companies could affect our competitive position across all business areas. Additionally, acquisitions of our customers or suppliers by competitors could result in lost business, impacting our operations and financial performance. However, we do not have any direct listed peers of our business.

43. Changes in technology may render our current technologies obsolete or require us to undertake substantial capital investments, which could adversely affect our results of operations.

We take all the possible steps to keep ourselves upgraded to the latest technology. Technologies currently under development or that may be developed in the future, if employed by our existing competitors or new entrants, may adversely affect our competitiveness. The development and application of new technologies involve time, substantial cost and risk. Our competitors may be able to deploy new technologies before us and we cannot predict how emerging and future technological changes will affect our operations or the competitiveness of our services. If we fail to successfully implement new technologies in a timely manner or at all, our business, financial condition and results of operations may be adversely affected.

44. Some of the vehicles appearing in our books of accounts are not registered in the name of our Company.

Some of the vehicles recorded in our books of accounts and used by us for business purpose are legally registered in the name of our Promoter Mr. Suraj Pandey, while our Company is the beneficial owner of such vehicles. Further, our Company has an outstanding loan of Rs. 31.84 Lakhs as on March 31, 2025 on such vehicles. Though, the promoters have given NOC to our company for use of such vehicles, in case any dispute arises in future regarding ownership or usage of such vehicles, we may not be able to effectively establish ownership of such vehicles, which may affect our financial condition and results of operations

45. Liquidity Risk and Dependence on Market Maker Continuity on the BSE SME Platform

Our equity shares will be listed on the SME Platform, which typically has lower liquidity compared to the main board. Limited trading volumes may result in price volatility and difficulty for investors in buying or selling shares at desired prices. While a market maker will be appointed to support liquidity, there is no assurance of their continued effectiveness or participation. If the market maker fails to maintain quotes or withdraws, it could adversely affect trading, widen bid-ask

spreads, and impact the market price of our shares. As a result, investors may face challenges in exiting their investments promptly or at favourable prices.

46. Adverse publicity regarding our products could negatively impact us.

Adverse publicity regarding any of our products or similar products marketed or sold by others could negatively affect us. Even though no such instance is faced in past, if any studies raise or substantiate concerns regarding the efficacy or safety of our products or other concerns, our reputation could be harmed and demand for our products could diminish, which could have a material adverse effect on growth in new customers and sales of our product, leading to a decline in revenues, cash collections, and ultimately our ability to meet operating cash flow requirements.

47. We may not be successful in implementing our business strategies

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in its first year of operation, there is no guarantee that we can implement the same on time and within the estimated budget going forward or that we will be able to meet the expectations of our targeted customers. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

48. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Offer proceeds may delay the implementation schedule.

The proposed fund requirement for our working capital requirements, repayment and/or pre-payment, in full or part, of borrowing availed by our Company, funding capital expenditure towards purchase of additional plant & machinery as detailed in the section titled “*Objects of the Offer*” is to be funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Offer proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute our future plans/strategy within the given timeframe. For details, please refer to the Chapter titled “*Objects of the Offer*” beginning on page 89 of this Draft Red Herring Prospectus.

49. We are subject to restrictive covenants under our credit facilities that limit our operational flexibility.

The loan agreements entered into by us with banks contain specific covenants which require us to obtain the prior approval/permission from the banks on the occurrence of certain events. Further, there can be no assurance that such consents will be granted or that we will be able to comply with the financial covenants under our financing arrangements. In the event we breach any financial or other covenants contained in any of our financing arrangements, we may be required under the terms of such financing arrangements to immediately repay our borrowings either in whole or in part, together with any related costs. This may adversely impact our results of operations and cash flows. For further details on the Cash Credit Limits and other banking facilities, please see “*Statement of Financial Indebtedness*” on page 258 of this Draft Red Herring Prospectus.

50. Our lenders have charge over assets in respect of finance availed by us

We have secured our lenders by creating a charge over our assets in respect of credit facilities availed by us from banks. The total amounts outstanding and payable by us as secured loans were Rs. 6,207.78 lakhs as on March 31, 2025. In the event, we default in repayment of the credit facilities availed by us and any interest thereof, hypothecation charge on our movable’s assets may be invoked by the lenders, which in turn could have significant adverse effect on business, financial condition or results of operations. For further information on the Financial Indebtedness please refer chapter titled “*Financial Indebtedness*” beginning page 258 of the Draft Red Herring Prospectus.

51. We have in the past entered into related party transactions and may continue to do so in the future.

Our Company has entered into various transactions with our Directors, Promoter and Promoter Group members/ entities. These transactions, inter-alia includes sales, purchase, remuneration and loans and advances etc. For details, please refer to “*Annexure-XXXV - Related Party Disclosures*” under Section titled “*Financial Information of the Company*” and Chapter titled “*Capital Structure*” beginning on page 245 and 77 respectively of the Draft Red Herring Prospectus. All related party transactions entered into by us in the last three financial years have been at arms’ length and in the interests of our Company. Although all related-party transactions that we may enter into in the future are subject to approval by our Audit Committee, Board or shareholders, as required under the Companies Act, we cannot assure you that such future transactions or any other future transactions, individually or in aggregate, will not have an adverse effect on our financial

condition and results of operations or that we could not have achieved more favorable terms if such transactions are not entered into with related parties. Such related party transactions in the future or any other future transactions may potentially involve conflicts of interest which may be detrimental to the interest of our Company and we cannot assure you that such transactions, individually or in the aggregate, will always be in the best interests of our minority shareholders and will not have an adverse effect on our business, financial condition and results of operations.

52. Our Company will not receive any proceeds from the Offer for Sale portion, and the Selling Shareholder shall be entitled to the Offer Proceeds to the extent of the Equity Shares offered by the Selling Shareholder in the Offer for Sale.

The Offer consists of a Fresh Issue and Offer for Sale, where, offer for Sale will be made by the Selling Shareholder. The entire proceeds of the Offer for Sale will be transferred to the Selling Shareholder and will not result in any creation of value for us or in respect of your investment in our Company. The entire proceeds from the Offer for Sale will be paid to the Selling Shareholder, and our Company will not receive any proceeds from the Offer for Sale. For further details, see “***Objects of the Offer***” on page 89 of this Draft Red Herring Prospectus.

53. We have incurred indebtedness which exposes us to various risks which may have an effect on our business and results of operations.

Our ability to borrow and the terms of our borrowings will depend on our financial condition, the stability of our cash flows, general market conditions, economic and political conditions in the markets where we operate and our capacity to service debt. As on March 31, 2025, our total outstanding indebtedness was Rs. 8,116.86 lakhs including secured and unsecured loans.

Our significant indebtedness in future may result in substantial amount of debt service obligations which could lead to: a) increasing our vulnerability to general adverse economic, industry and competitive conditions; b) limiting our flexibility in planning for, or reacting to, changes in our business and the industry; c) affecting our credit rating; d) limiting our ability to borrow more money both now and in the future; and e) increasing our interest expenditure and adversely affecting our profitability.

If the loans are recalled on a shorter notice, we may be required to arrange for funds to fulfil the necessary requirements. The occurrence of these events may have an effect on our cash flow and financial conditions of the company. For further details regarding our indebtedness, see “***Statement of Financial Indebtedness***” on page 258 of this Draft Red Herring Prospectus.

54. None of our Directors have prior experience serving on the board of a listed company, which may affect our ability to efficiently discharge certain responsibilities as a listed entity.

None of our Directors have previously served on the board of a listed company and, accordingly, may not be fully familiar with the governance, compliance, and reporting requirements or industry practices applicable to listed entities. Consequently, there can be no assurance that this lack of experience will not have an adverse impact on the management, governance, or operations of our Company. Post listing, we will be subject to the requirements of the SEBI Listing Regulations and other applicable laws. Our Board intends to comply with such requirements, including by engaging professionals with relevant expertise; however, there can be no assurance that such measures will fully mitigate the risks associated with our Directors’ lack of prior listed company experience.

55. The requirements of being a public listed company may strain our resources and impose additional requirements

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we were not required to incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management’s attention may be diverted from other business concerns, which could have an adverse effect on our business and operations.

There can be no assurance that we will be able to satisfy our reporting obligations. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner. Failure of our Company to meet the listing requirements of stock exchange, if any, could lead to imposition of penalties, including suspension of trading in shares of the Company.

- 56. *We are subject to the risk of failure of, or a material weakness in, our internal control systems. If the company are unable to establish and maintain an effective system of internal controls and compliances business and reputation could be adversely affected.***

We are exposed to risks arising from the inadequacy or failure of internal systems or processes, and any actions we may take to mitigate these risks may not be sufficient to ensure an effective internal control environment. Given our high volume of transactions, errors may be repeated or compounded before they are discovered and rectified. Our management information systems and internal control procedures may not be able to identify non-compliance or suspicious transactions in a timely manner, or at all. Where internal control weaknesses are identified, our actions may not be sufficient to fully correct such weaknesses. As a result, we may incur expenses or suffer monetary losses, which may not be covered by our insurance policies and may result in a material effect on our business, financial condition and results of operations.

- 57. *The average cost of acquisition of Equity Shares by our Promoter, are lower than the face value of Equity Share.***

- 58. *The Objects of the Offer for which funds are being raised have not been appraised by any bank or financial institution. Any variation between the estimation and actual expenditure as estimated by the management could result in execution delays or influence our profitability adversely.***

The deployment of funds as stated in the “*Objects of the Offer*” beginning on page 89 of the Draft Red Herring Prospectus is entirely at the discretion of our management and has not been appraised by any independent agency. Further, the purposes for which the Net Proceeds are to be utilized have not been appraised by an independent entity and are based on our management estimates. In the event, for whatsoever reason, we are unable to execute our plans, we could have a significant amount of unallocated net proceeds. In such a situation, we would have broad discretion in allocating these net proceeds from the Offer without any action or approval of our shareholders. In case the assumptions on which these estimates have been made are not correct or they become un-realistic then there will be a variation in the estimates and the actual expenditure incurred which could result in execution delays and have an adverse effect on our operations and profitability.

- 59. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.***

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, working capital requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholder’s investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “*Dividend Policy*” on page 179 of this Draft Red Herring Prospectus.

- 60. *Any future issuance of Equity Shares, or convertible securities or other equity linked securities by us and any sale of Equity Shares by our significant shareholders may dilute your shareholding and adversely affect the trading price of the Equity Shares***

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by us may dilute your shareholding in the Company, adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. No assurance may be given that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our significant shareholders, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that we will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

- 61. *Our Promoter and Promoter Group will jointly continue to retain majority shareholding in our Company after this Offer which will allow them to determine the outcome of the matters requiring the approval of shareholders***

As a result of the same, they will be able to exercise significant influence over the control of the outcome of the matter that requires approval of the majority shareholder’s vote. Such a concentration of the ownership may

also have the affect of delaying, preventing or deterring any change in the control of our company. In addition to the above, our promoter will continue to have the ability to take actions that are not in, or may conflict with our interest or the interest of some or all of our minority shareholders, and there is no assurance that such action will not have any adverse effect on our future financials or results of operations.

We cannot assure you that D&B assumptions are correct or will not change and, accordingly, our position in the market may differ, favorably or unfavorably, from that presented in this Draft Red Herring Prospectus. Further, the commissioned report is not a recommendation to invest or disinvest in our Company. Prospective investors are advised not to unduly rely on the commissioned report or extracts thereof as included in this Draft Red Herring Prospectus, when making their investment decisions. For the disclaimers associated with the D&B Report, see “**Certain Conventions, Presentation of Financial, Industry and Market Data and Currency of Presentation-Industry and Market Data**” on page 19 of this Draft Red Herring Prospectus.

63. The Offer Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Offer and the market price of our Equity Shares may decline below the Offer Price and you may not be able to sell your Equity Shares at or above the Offer Price.

The Offer price is based on numerous factors. For further information, see the chapter titled “**Basis for Offer Price**” beginning on page 102 of this Draft Red Herring Prospectus and may not be indicative of the market price of our Equity Shares after the Offer. The market price of our Equity Shares could be subject to significant fluctuations after the Offer and may decline below the Offer Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Offer Price. The factors that could affect our share price are:

- Variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings;
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

64. There is no guarantee that the Equity Shares issued pursuant to the Offer will be listed on the SME Platform of BSE in a timely manner or at all.

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Offer will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuance of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of BSE. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

65. Certain data mentioned in this Draft Red Herring Prospectus has not been independently verified.

We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the limitation that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

66. Our Company has during the preceding one year from the date of the Draft Red Herring Prospectus have allotted Equity Shares at a price which may be lower than the Offer Price.

We have issued Equity Shares in the last one year from the date of the Draft Red Herring Prospectus at a price which may be lower than the Offer price, as set out in the table below. For further information, see “*Capital Structure*” at page 77.

Date of allotment of Equity Shares	Number of Equity Share allotted	Face value per Equity Share (in Rs.)	Issue price per Equity Share (in Rs.)	Nature of Consideration	Reason of Allotment
March 04, 2025	1,87,000	10	165	Cash	Private Placement
June 07, 2025	2,00,000	10	165	Cash	Private Placement

The prices at which Equity Shares were issued by us in the past year should not be taken to be indicative of the Price Band, Offer Price and the trading price of our Equity Shares after listing.

67. Significant differences exist between Ind AS and other accounting principles, such as Indian GAAP, IFRS and U.S. GAAP, which may be material to investors’ assessments of our financial condition, result of operations and cash flows.

Our restated summary statements of assets and liabilities, restated summary statements of profit and loss and cash flows for the fiscal year 2025, 2024 and 2023 have been prepared in accordance with the Indian GAAP. We have not attempted to quantify the impact of IND AS, US GAAP, IFRS or any other system of accounting principles on the financial data included in the Draft Red Herring Prospectus, nor do we provide a reconciliation of our financial statements to those of US GAAP, IFRS or any other accounting principles. Accordingly, the degree to which the Restated Financial Information included in the Draft Red Herring Prospectus will provide meaningful information is entirely dependent on the reader’s level of familiarity with Ind AS, Indian GAAP and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in the Draft Red Herring Prospectus should accordingly be limited.

68. Any of the Bidders are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid.

Pursuant to the SEBI ICDR Regulations, Any of the Bidders are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. While we are required to complete Allotment, listing and commencement of trading pursuant to the Offer within three (3) Working Days from the Bid/ Offer Closing Date, events affecting the Bidders’ decision to invest in our Equity Shares, including adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations, cash flows and financial condition may arise between the date of submission of the Bid and Allotment, listing and commencement of trading. We may complete the Allotment, listing and commencement of trading of our Equity Shares even if such events occur and such events may limit the Bidders’ ability to sell our Equity Shares Allotted pursuant to the Offer or may cause the trading price of our Equity Shares to decline on listing.

69. We may be subject to surveillance measures, such as the Additional Surveillance Measures (ASM) and the Graded Surveillance Measures (GSM) by the Stock Exchanges which may adversely affect trading price of our Equity Shares.

SEBI and Stock Exchanges in order to enhance market integrity and safeguard interest of investors, have been introducing various enhanced pre-emptive surveillance measures. The main objective of these measures is to alert and advice investors to be extra cautious while dealing in these securities and advice market participants to carry out necessary due diligence while dealing in these securities. Accordingly, SEBI and Stock Exchanges have provided for (a) GSM on securities where such trading price of such securities does not commensurate with financial health and fundamentals such as earnings, book value, fixed assets, net-worth, price per equity multiple and market capitalization; and (b) ASM on securities with surveillance concerns based on objective parameters such as price and volume variation and volatility. On listing, we may be subject to general market conditions which may include significant price and volume fluctuations. The price of our Equity Shares may also fluctuate after the Offer due to several factors such as volatility in the Indian and global securities market, our profitability and performance, performance of our competitors, changes in the estimates of our performance or any other political or economic factor. The occurrence of any of the abovementioned factors may trigger the parameters identified by SEBI and the Stock Exchanges for placing securities under the GSM or ASM framework such as net worth and net fixed assets of securities, high low variation in securities, client concentration and close to close price variation. In

the event our Equity Shares are subject to such pre-emptive surveillance measures implemented by the Stock Exchange, we may be subject to certain additional restrictions in connection with trading of our Equity Shares such as limiting trading frequency (for example, trading either allowed once in a week or a month) or freezing of price on upper side of trading which may have an adverse effect on the market price of our Equity Shares or may in general cause disruptions in the development of an active trading market for our Equity Shares.

EXTERNAL RISK FACTORS:

70. Changing laws, rules and regulations and legal uncertainties, including any adverse application of corporate and tax laws, may adversely affect our business, cash flows, prospects and results of operations.

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, cash flows, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

For instance, GoI has notified the Finance Act, 2021 (“Finance Act”), which introduced various amendments to the taxation laws in India. Under the Finance Act, in the absence of a specific provision under an agreement, the liability to pay stamp duty in case of sale of securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. The stamp duty for transfer of securities other than debentures, on a delivery basis is specified at 0.015% and on a non-delivery basis is specified at 0.003% of the consideration amount.

Further, the GoI has announced the Union Budget for the Financial Year 2023 pursuant to which the Finance Act of 2022 has introduced various amendments. Unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. Further, the GoI introduced new laws relating to social security, occupational safety, industrial relations and wages namely, the Code on Social Security, 2020 (“Social Security Code”), the Occupational Safety, Health and Working Conditions Code, 2020, the Industrial Relations Code, 2020 and the Code on Wages, 2019, which consolidate, subsume and replace numerous existing central labor legislations, were to take effect from April 1, 2021 (collectively, the “Labour Codes”). The GoI has deferred the effective date of implementation of the respective Labour Codes, and they shall come into force from such dates as may be notified. Different dates may also be appointed for the coming into force of different provisions of the Labour Codes. While the rules for implementation under these codes have not been finalized, as an immediate consequence, the coming into force of these codes could increase the financial burden on our Company, which may adversely impact our profitability. For instance, under the Social Security Code, a new concept of deemed remuneration has been introduced, such that where an employee receives more than half (or such other percentage as may be notified by the Central Government) of their total remuneration in the form of allowances and other amounts that are not included within the definition of wages under the Social Security Code, the excess amount received shall be deemed as remuneration and accordingly be added to wages for the purposes of the Social Security Code and the compulsory contribution to be made towards the employees’ provident fund.

Additionally, the Ministry of Electronics and Information Technology has brought about a ‘new regime’ on data protection in India by notifying Digital Personal Data Protection Act, 2023 (“DPDP Act”) on August 11, 2023. The DPDP Act, amongst other obligations, prescribes format for obtaining consent and giving notice for processing of personal data, along with certain legitimate uses for which personal data can be processed. The notification for its implementation is awaited and its rules are yet to be notified.

Unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, cash flows, results of operations and prospects. Uncertainty in the application, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our businesses in the future.

71. Political, economic or other factors that are beyond our control may have an adverse effect on our business and results of operations.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate.

There have been periods of slowdown in the economic growth of India. Demand for our services may be adversely affected by an economic downturn in domestic, regional and global economies. The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

72. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

73. The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

74. Instability in financial markets could materially and adversely affect our results of operations and financial condition.

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Historically, Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

75. An outbreak of other infectious or virulent diseases, if uncontrolled, may have an adverse effect on our operations.

An outbreak of any infectious or virulent diseases, such as severe acute respiratory syndrome, the COVID-19 virus, the H1N1 virus, avian influenza (bird flu), the Zika virus or the Ebola virus, if uncontrolled, may have a material adverse effect on the economies of certain countries and our operations. If any of our employees or the employees of our suppliers and/or customers are infected with such diseases or if a significant portion of our workforce refuses to work for fear of contracting an infectious disease, our Company, our suppliers and/or our customers may be required to shut down operations for a period of time, and this could adversely affect our business, results of operations and financial condition.

76. Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

77. *Terrorist attacks or war or conflicts involving India or other countries could adversely affect consumer and business sentiment and the financial markets and adversely affect our business.*

Terrorist attacks and other acts of violence or war may adversely affect global equity markets and economic growth as well as the Indian economy and stock markets. Such acts negatively impact business and economic sentiment, which could adversely affect our business and profitability. Also, India has from time to time experienced, and may experience, social and civil unrest and hostilities with neighbouring countries. Armed conflicts could disrupt communications and adversely affect the Indian economy. Such events could also create a perception that investments in Indian companies involve a high degree of risk. This, in turn, could have a material adverse effect on the market for securities of Indian companies, including our Equity Shares. The consequences of any armed conflicts are unpredictable and we therefore may not be able to foresee events that could have an adverse effect on our business.

78. *Investor may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Previously, any gain realized on the sale of listed equity shares on or before March 31, 2018 on a stock exchange held for more than 12 months was not subject to long term capital gains tax in India if Securities Transaction Tax ("STT") was paid on the sale transaction and additionally, as stipulated by the Finance Act, 2017, STT had been paid at the time of acquisition of such equity shares on or after October 1, 2004, except in the case of such acquisitions of Equity Shares which are not subject to STT, as notified by the Central Government under notification no. 43/2017/F. No. 370142/09/2017-TPL on June 5, 2017. However, the Finance Act, 2018, now seeks to tax on such long-term capital gains exceeding ₹ 100,000 arising from sale of equity shares on or after April 1, 2018, while continuing to exempt the unrealized capital gains earned up to January 31, 2018 on such Equity Shares. Currently, Long-Term Capital Gains (LTCG) on shares and equity-oriented mutual funds in India are taxed. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

79. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

80. *Our business and activities are regulated by the Competition Act.*

The Competition Act, 2002 (the "**Competition Act**") was enacted for the purpose of preventing practices having an adverse effect on competition in India and has mandated the Competition Commission of India (the "**CCI**") to regulate such practices. Under the Competition Act, any arrangement, understanding or action, whether formal or informal, which causes or is likely to adversely affect competition in India is void and may result in substantial penalties. Any agreement among competitors which directly or indirectly determines purchase or sale prices, directly or indirectly results in bid rigging or collusive bidding, limits or controls production, supply, markets, technical development, investment or the provision of services, or shares the market or source of production or provision of services in any manner, including by way of allocation of geographical area or types of goods or services or number of clients in the relevant market or any other similar way, is presumed to adversely affect competition in the relevant market in India and shall be void. The Competition Act also prohibits the abuse of dominant position by any enterprise. Further, if it is proved that any contravention committed by a company took place with the consent or connivance or is attributable to any neglect on the part of, any director, manager, secretary or other officer of such company, that person shall be guilty of the contravention and may be punished.

Consequently, all agreements entered into by us may fall within the purview of the Competition Act. Further, the CCI has extraterritorial powers and can investigate any agreements, abusive conduct or combination occurring outside India if such agreement, conduct or combination adversely affects competition in India. The applicability of any provision of the Competition Act, or any enforcement proceedings initiated by the CCI, or any adverse publicity that may be generated due to scrutiny or prosecution by the CCI or if any prohibition or substantial penalties are levied under the Competition Act, may adversely affect our business, results of operations and prospects.

81. Foreign investors are subject to foreign investment restrictions under Indian law that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain restrictions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Indian Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/tax clearance certificate from the income tax authority. Additionally, the GoI may impose foreign exchange restrictions in certain emergency situations, including situations where there are sudden fluctuations in interest rates or exchange rates, where the GoI experiences extreme difficulty in stabilizing the balance of payments or where there are substantial disturbances in the financial and capital markets in India. These restrictions may require foreign investors to obtain the GoI's approval before acquiring Indian securities or repatriating the interest or dividends from those securities or the proceeds from the sale of those securities. We cannot assure you that any required approval from the RBI or any other GoI agency can be obtained on any particular terms, or at all.

82. The ability of Indian companies to raise foreign capital may be constrained by Indian law.

As an Indian company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under the Foreign Exchange Management Act (the “**FEMA**”) and the rules thereunder. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

Key Justifications

The working capital projections made by our Company are based on certain key justifications, as set out below:

Sr. No.	Particulars
Trade Receivables	The historical holding days of trade receivables (calculated as closing trade receivables divided by revenue from operations over 365 days) has increased from 205 days to 294 days during last three financial. The specific terms of our work orders and tenders provide variations in our debtor cycle.

	As per the current credit terms of the company & prevalent trend in business of the company, the holding level for debtors is anticipated at 195 & 165 days of total revenue from operations during Fiscal 2026 & 2027. Our customer base comprises of government authorities where payments of running account bills are approved post inspection and satisfactory verification by the authorities. Given the historically high seasonality of the business, with sales skewed largely towards the last quarter, trade receivables appear elevated.
Trade Payables	Past trend of trade payable holding days (calculated as closing trade payables as on balance sheet date divided by cost of material consumed and purchase of traded goods over 365 days) has been in range 220 to 282 days during the last three financial years. However, our Company intends to reduce trade payable in the range of 90-100 days for Fiscal 2026 & 2027 to avail cash discount as well as competitive purchase price to increase overall profitability of our Company. Our Company plans to streamline its payable processes to its vendors enabling it to negotiate for better rates and thereby the holding levels are expected to reduce to 90-100 days in fiscal 2026 & 2027. Additionally, prompt payments empower us to negotiate more favorable terms and prices, fostering stronger supplier relations and bolstering our bottom line.
Inventories	Our business requires procuring inventories in large quantities to fulfil project needs. Given the increase in our order books and that our projects are spread across India, managing multiple logistics poses a consistent challenge. Inventories include raw materials, WIP goods, finished goods, and traded goods. The historical holding days of Inventories (calculated as closing raw material, finished goods & WIP inventory on Balance sheet date divided by revenue from operations over 365 days) has been in range of 15 to 36 days during the last three financial years. Our Company estimates inventories holding days to be around 14 days in Fiscal 2026 and 11 days in Fiscal 2027. Further in order to avoid any supply chain disruption the company expects to maintain such Inventory levels.
Cash and cash equivalents	Bank balances other than Cash and cash equivalents majorly includes Margin on Non Fund Based Limits by way of Fixed Deposits with original maturity of more than 3 months and less than 12 months from the Balance sheet date.

2. Repayment and/or pre-payment, in full or part, of borrowing availed by our Company

Our Company has entered into various financial arrangements from time to time, with banks and financial institutions. The loan facility availed by our Company including borrowing in the form of inter alia, term loans and working capital facility from various lenders. For details of our outstanding financial indebtedness, see '*Statement of Financial Indebtedness*' on page 258 of this Draft Red Herring Prospectus. As at August 31, 2025, we have various borrowings facilities with total outstanding amount of ₹ 7,449.32 lakhs (including fund based & unsecured loan)

We propose to utilize an estimated amount of ₹4,500 Lakhs from the Net Proceeds to repay in part or full certain borrowing, listed below, availed from the lender by our Company. Pursuant to the terms of the financing arrangements, prepayment of certain borrowings may attract prepayment charges as prescribed by the respective lender. Such prepayment charges, as applicable, will be funded from the internal accruals of our Company.

We believe that such repayment will help reduce our outstanding indebtedness and debt servicing costs and enable utilization of our internal accruals for further investment in our business growth and expansion. Additionally, we believe that the leverage capacity of our Company will improve our ability to raise further resources in the future to fund our potential business development opportunities and plans to grow and expand our business.

Global Macroeconomic Scenario

The global economy, which recorded GDP growth at 3.3% in CY 2024, is expected to show resilience at 3.0% in CY 2025. This marks the slowest expansion since 2020 and reflects a -0.3%point downgrade from January 2025 forecast. Moreover, the projection for CY 2026 has also reduced to 3.1%. This slowdown is majorly attributed due to numerous factors such as high inflation in many economies despite central bank effort to curb inflation, continuing energy market volatility driven by geopolitical tensions particularly in Ukraine and Middle East, and the re-election of Donald Trump as US President extended uncertainty around the trade policies as well as overall global economic growth. High inflation and rising borrowing costs affected the private consumption on one hand while fiscal consolidation impacted the government consumption on the other hand. As a result, global GDP growth is projected to slow down from 3.3% in CY 2024 to 3.0% in CY 2025.

Global Economic Outlook

The global macroeconomic environment remains shaped by divergent regional trends and continued geopolitical and policymaking uncertainties. A wave of new U.S. tariffs, mostly effective from August 7, has shaken markets and raised costs for global trade. On August 1, the U.S. announced higher tariff rates for countries from which it imports goods, with most of the rates effective from August 7. A 15% rate will act as a baseline floor for countries with which the U.S. has a trade deficit; a 10% rate applies for those with which the U.S. has a trade surplus. However, there are some countries that are subject to higher U.S. tariffs.

Global Growth Projection

At broader level, the global economy is expected to experience a slowdown in 2025, with GDP growth projected to decline to 3.0%, down from 3.3% in 2024. This deceleration reflects persistent inflationary pressure, geopolitical uncertainties and tightened monetary policies. However, a slightly recovery is anticipated in 2026, with growth projected to improve to 3.1%. Global inflation is expected to decline steadily, to 4.2% in 2025 and to 3.6% in 2026. Inflation is projected to converge back to the target earlier in advanced economies, reaching 2.2% in 2026, whereas in emerging market and developing economies, it is anticipated to decrease to 4.6% during the same period. Trade tariffs function as a supply shock for the countries imposing them, leading to a decrease in productivity and an increase in unit costs. Countries subject to tariffs experience a negative demand shock as export demand declines, placing downward pressure on prices. In each scenario, trade uncertainty introduces an additional layer of demand shock since businesses and households react by delaying investment and spending, and this impact could be intensified by stricter financial conditions and heightened exchange rate volatility. Moreover, Global trade growth is expected to slow down in 2025 to 1.7%. This forecast reflects increased tariff restrictions affecting trade flows and, to a lesser extent, the waning effects of cyclical factors that have underpinned the recent rise in goods trade. Geopolitical tensions as seen in the past such as the wars in Ukraine and the Middle East could exacerbate inflation volatility, particularly in energy and agricultural commodities.

India Macroeconomic Analysis

India emerged as one of the fastest growth economies amongst the leading advanced economies and emerging economies. In CY 2024, even amidst geopolitical uncertainties, particularly those affecting global energy and commodity markets, India continues to remain one of the fastest growing economies in the world and is expected to grow by 6.4% in CY 2025.

The Government stepped spending on infrastructure projects to boost the economic growth had a positive impact on economic growth. The capital expenditure of the central government increased by average 26.52% during FY 2023-FY 2024 which slowed to 7.27% in FY 2025 which is expected to translate in moderating GDP growth of 6.4% in CY2025. In the Union Budget 2025-2026, the government announced INR 11.21 billion capex on infrastructure (10.12% higher than previous year revised estimates) coupled with INR 1.5 trillion in interest-free loans to states. This has provided much-needed confidence to the private sector, and in turn, expected to attract the private investment.

Growth Outlook

The Union Budget 2025-26 has laid the foundation for sustained growth by balancing demand stimulation, investment promotion and inclusive development. Inflation level is reaching within the central bank's target; the RBI may pursue further monetary easing that will support growth. The medium-term outlook is bright, fueled by the emphasis on physical and digital infrastructure spending. With a focus on stimulating demand, driving investment and ensuring inclusive development, the budget introduces measures such as tax relief, increased infrastructure spending and incentives for manufacturing and clean energy. These initiatives aim to accelerate growth while maintaining fiscal discipline, reinforcing India's long-term economic resilience. The expansion of tax relief i.e. zero tax liability for individuals earning up to INR

12 lacs annually under the new tax regime is expected to strengthen household finances and, consequently, boost consumption.

The external sector remains resilient, and key external vulnerability indicators continue to improve. However, tariff-related uncertainty is likely to weigh on exports and investment, prompting us to cut our CY26 GDP growth forecast to 6.4%.

Passenger Railway Segment in India

India's passenger railway segment is the lifeline of the nation, forming the backbone of its transportation network. As the world's largest railway network in terms of electrification and the second largest in terms of routes, it carries billions of passengers annually. Offering a diverse range of trains from budget-friendly to high-speed options, Indian Railways caters to a vast populace. While challenges such as overcrowding and infrastructure bottlenecks persist, ongoing modernization efforts, including electrification, track upgrades, and introduction of advanced trains like Tejas and Vande Bharat, aim to enhance passenger experience and capacity. The segment plays a pivotal role in connecting urban and rural India, boosting economic growth, and facilitating social mobility, making it a cornerstone of the country's development.

Key Factors Driving Passenger Growth in Indian Railways

Economic Growth and Rising Disposable Incomes

India's burgeoning economy has led to a significant rise in disposable incomes. As people have more money to spend, they are increasingly opting for convenient and affordable modes of transportation. Railways, being a relatively inexpensive mode of travel, have benefited immensely from this trend. Moreover, the growing middle class is a significant contributor to passenger growth, as they seek comfortable and reliable travel options.

Urbanization and Migration

The rapid pace of urbanization in India is driving a substantial increase in passenger numbers. People are moving to cities in search of better job opportunities, leading to a surge in intra-city and inter-city travel. Railways, with their extensive network, are well-positioned to cater to the transportation needs of these urban migrants.

Affordability and Accessibility

Indian Railways has always been synonymous with affordability, making it a preferred choice for a large section of the population. The vast network of railway stations ensures accessibility to even remote areas, further boosting passenger numbers. Additionally, various fare categories and concessions cater to the diverse needs of passengers, making rail travel inclusive.

Infrastructure Development

The Indian government's focus on infrastructure development has positively impacted the railway sector. Investments in new lines, track upgrades, and station modernization have enhanced the overall travel experience. The introduction of high-speed trains and improved amenities have attracted a new segment of passengers who prioritize comfort and speed.

Government Initiatives and Policies

Several government initiatives have contributed to passenger growth. Subsidies on passenger fares, especially for students and senior citizens, have made rail travel more accessible. The introduction of passenger-friendly schemes like IRCTC and online ticket booking has simplified the booking process, attracting more passengers. Furthermore, the government's emphasis on safety and security has instilled confidence among travelers.

Changing Lifestyle and Preferences

The evolving lifestyle of Indians has also influenced passenger growth. With increasing awareness of health and fitness, many people prefer to travel by train to avoid traffic congestion and pollution. Moreover, the growing trend of leisure travel has led to a surge in demand for tourist trains and special packages, contributing to overall passenger numbers.

Demographic Dividend

India's young and growing population is a significant factor driving passenger growth. The youth, with their increasing disposable incomes and desire to explore, are contributing to the rising demand for rail travel. Students rely heavily on railways for commuting to educational institutions. In conclusion, a combination of economic growth, urbanization, affordability, infrastructure development, government policies, and changing lifestyle preferences are collectively propelling passenger growth in Indian Railways.

Furnishing & Refurbishment of Passenger Coaches

India has one of the world's largest railway networks and due to its socio-economic importance, the Indian government is investing heavily in the revamping of the railway overall infrastructure, making it an attractive market for investors and entrepreneurs alike. This also involves modernization of the railway coaches, including refabrication of railway furniture and other interior furnishing to raise passenger satisfaction and make their travel experience comfortable and enjoyable.

The furnishing and modernization of railway coaches involved improvement and modernization of seating area in the passenger coach including seats, seats fabric (textiles, sustainable leathers, and alternative materials), ceiling, Flooring, lights, HVAC, gallery equipment, passenger infotainment system, washroom facilities, door system, safety system, fire safety and protections and others.

Market Opportunities for Passenger Coach Furnishing

The Indian government focus effort on improving the railway coaches, has made the Railway furnishing segment one of the most attractive markets for international companies looking to invest in the sector. The industry holds sizable growth potential with several opportunities to capitalize on emerging trends in technology and innovation in this segment.

New Coaches Capacity Expansion

The Indian Railways currently operates approximately over 1,03,054 coaches. Between 2020-21 to 2024-25, coach inventory has grown at a compound annual growth rate (CAGR) of 7%, a trend expected to continue due to rising demand for passenger rail services, particularly with the advent of bullet train corridors. The introduction of Vande Bharat trains and the expansion of metro systems are anticipated to further boost passenger traffic.

Indian Railways is undertaking significant capacity expansion through the addition of new passenger coaches to meet rising demand and improve passenger comfort. Here are the key insights regarding planned coach additions:

Planned Coach Additions

Indian Railways has achieved a significant milestone in the 2024–25 financial year by producing 7,134 coaches, marking a 9% increase over the previous year's output of 6,541 coaches. This achievement is supported by its three major coach manufacturing units: the Integral Coach Factory (ICF) in Chennai, Rail Coach Factory (RCF) in Kapurthala, and Modern Coach Factory (MCF) in Rae Bareilly.

In line with its commitment to equitable mobility and affordable infrastructure, the Ministry of Railways has announced plans to manufacture 17,000 general-class and non-air-conditioned (non-AC) sleeper coaches over the next five years. These coaches are vital to the Indian Railways network, which currently operates a fleet of approximately 82,200 coaches, with 57,200 (around 70%) being non-AC. Non-AC coaches provide nearly 78% of the 6.9 million daily seats, serving as the backbone of budget-friendly rail travel.

Conversion of Rail Bogies:

According to the Interim Budget 2025, Indian Railways plans to upgrade 40,000 conventional coaches to Vande Bharat standards, which represents approximately 42% of the existing coach fleet. The Vande Bharat standard includes enhanced safety features such as semi-permanent couplers, as well as improved passenger amenities, including more comfortable seating, charging points, CCTV surveillance, GPS, and upgraded toilet sanitation facilities.

The strategic focus on increasing the number of non-AC and general coaches reflects Indian Railways' commitment to addressing overcrowding and improving passenger experience. This planned expansion is crucial for accommodating the growing number of passengers and enhancing the overall efficiency of the rail network.

Metro Expansion Plans

The expansion of metro rail systems across India is set to include significant additions of new coaches to enhance capacity and improve service. Here are the key insights regarding planned coach additions in various metro projects:

Chennai Metro

- **New Coach Procurement:** Chennai Metro Rail Ltd (CMRL) has invited bids for 32 new train sets as part of the Phase 2 project, which spans 116.1 km. This includes the procurement of coaches that are 2.9 meters wide, designed for standard gauge tracks, and will be configured as DMC+TC+DMC (Driving Motor Car + Trailer Car). The initial prototype train is expected to be produced within 630 days, with subsequent trains delivered in a phased manner over the next three years.

Delhi Metro

- The Delhi Metro Rail Corporation (DMRC) has announced plans to launch India's first metro corridor featuring three-coach trains. These trains will run on the Lajpat Nagar to Saket G Block route, part of the Phase-IV expansion of the metro network. The initiative is aimed at improving last-mile connectivity and ensuring seamless integration with existing metro lines.

Bhubaneswar Metro

- **Rolling Stock Contract:** The Delhi Metro Rail Corporation (DMRC) has invited tenders for 39 new standard gauge coaches for Bhubaneswar Metro's Phase 1 project. These coaches will form 13 train sets and are designed to accommodate a fully loaded capacity of 972 passengers per train. The contract includes a provision for local manufacturing to support the "Make in India" initiative.

Hyderabad Metro

- **Future Coach Additions:** Hyderabad Metro Rail (HMRL) has announced plans to expand its fleet. Over the past seven years, HMRL has operated with 57 trains, comprising 171 coaches. To ease congestion during peak hours, the authority will procure 10 new three-coach trains, boosting the total fleet to 67 trains and 201 coaches. This move addresses long-standing passenger requests for six-coach configurations and reflects HMRL's commitment to enhancing capacity and commuter convenience.

Bengaluru Metro

- Bengaluru Metro Rail Corporation Limited (BMRL) has signed a contract extension agreement with BEML Ltd. to procure an additional 7 train-sets of 6 coaches for Pink Line (Reach-6) of the 73.92 km Bangalore Metro Phase 2 project. This 42 coach contract for the 21.38 km Pink Line (Kalena Agrahara – Nagawara) is worth Rs. 405 crore and takes the total number of trainsets under Package 5RS-DM from 53 trains (318 coaches) to 60 trains (360 coaches).

Pune Metro

- Pune Metro is set to expand its operations with the addition of 15 new trains, comprising 45 extra coaches. This initiative by Maha Metro aims to improve commuter convenience and bolster the city's public transportation network. The move comes in response to rising passenger numbers and the recent approval of two new metro corridors. At present, Pune Metro runs 34 trains with a total of 102 coaches. With the planned expansion, the fleet will grow to 49 trains and 147 coaches, as each new train will include three coaches. This upgrade is expected to alleviate congestion during peak hours and reduce overall travel time for passengers.

Chandigarh Tricity Metro

- The forthcoming Tricity Metro project will feature a two-coach system, extending the first phase from 66 km to 77 km. This expansion is designed to enhance connectivity across Chandigarh, Mohali, and Panchkula, addressing significant traffic congestion in the region. The first phase of development is scheduled to occur between 2027 and 2037, with plans for approximately 30 stations.

The planned coach additions across various metro systems in India reflect a concerted effort to enhance urban transit capacity and improve passenger experience. With significant investments and expansions underway, these initiatives aim to meet the growing demand for efficient public transportation in urban areas.

Addressable Market Opportunity

Indian Railways operates a vast network with a substantial fleet of passenger coaches. These coaches, with an average lifecycle of 25-30 years, undergo significant wear and tear. To maintain passenger comfort and safety, regular refurbishment is essential. This presents a substantial opportunity for the coach furnishing and refurbishment industry. Refurbishment:

As of FY 2025, the total number of passenger coaches is approximately 1,03,054. Given the refurbishment cycle of 10–12 years, it can be inferred that roughly 8,588 coaches require refurbishment annually. Considering an average refurbishment cost of ₹30 lakhs per coach, as outlined in the Mission Retrofitment, the potential Total Addressable Market (TAM) for coach furnishing and refurbishment stands at a substantial ₹25,760 million or ₹2,576 crore. This figure represents the total revenue opportunity available to players in this market.

Total Addressable Market for Refurbishment	
Total number of Passenger Coaches in FY' 25	1,03,054
Average coach lifecycle	25-30 years
Refurbishment cycle	Every 10-12 years
Average refurbishment cost	Rs. 30 lakhs per coach (as per Mission Retrofitment)
Total number of coaches requiring refurbishment every year	8,588
Potential TAM annually	INR 2,576 Crore

Turnkey Furnishing:

The Total Addressable Market (TAM) for furnishing new passenger coaches in India is also substantial. With 8,684 new coaches produced annually, and an average turnkey furnishing cost of ₹45 lakhs per coach, the potential market size for turnkey furnishing stands at INR 39,080 million or ₹3,908 crore annually.

Total Addressable Market (Turnkey Furnishing)	
Annual production of new passenger coaches	8,684
Average furnishing cost	Rs. 45 lakhs per coach
Potential TAM	INR 3908 Crore

Market Potential and Growth Drivers

Aging Coach Fleet: The significant number of coaches nearing or exceeding their 25–30year lifecycle implies a consistent demand for refurbishment. As the railway network expands and passenger traffic grows, the number of coaches requiring refurbishment is likely to increase.

Government Initiatives: Government programs like Mission Retrofitment signal a strong push for improving passenger amenities. This, coupled with the focus on modernization, creates a favorable environment for the industry.

Passenger Expectations: Rising passenger expectations in terms of comfort and hygiene will drive demand for high-quality refurbishment services.

Technological Advancements: Innovations in materials, design, and manufacturing processes can lead to improved refurbishment solutions, opening up new market segments.

Surveillance & Monitoring Systems

VSS (Video Surveillance System)

The Video Surveillance System (VSS) for Indian Railways is an IP-based security solution that primarily uses CCTV cameras, along with Network Video Recorders (NVRs), display units, storage devices, and monitoring software. It is

designed to enhance passenger safety, security, and operational monitoring inside coaches, covering passenger saloons, entry/exit points, and gangways.

As per Railway Board's directives (2025), VSS is to be retrofitted in existing passenger coaches and installed in all newly manufactured coaches from September 2025 onwards. Each coach will be equipped with 4 dome-type CCTV cameras 2 at each entrance way to provide comprehensive coverage and monitoring. With an average lifecycle of about 7 years, VSS requires timely replacement or upgrades to ensure continued reliability and compatibility with evolving technologies.

The Total Addressable market for (VSS) Installation in existing coach translate into the opportunity worth INR 6183.24 crores.

CVVRS (Crew Voice & Video Recording System)

The Crew Voice & Video Recording System (CVVRS) is a safety and monitoring solution designed for locomotive cabins in Indian Railways. It records both video footage of crew activities and voice communications inside the driver's cab, along with instrument panel visuals, to ensure operational transparency and enhance accident investigation. Integrated with the Recording and Data Acquisition System (RDAS), CVVRS helps railway authorities analyse crew performance, detect human errors, and maintain compliance with safety protocols.

As per the Railway Board's directive a total of 14,615 CVVRS units (2,975 for diesel and 11,640 for electric locomotives) have been sanctioned under the Bulk RSP (PH-21), reflecting the government's push towards technology-driven railway safety measures.

Maintenance: Engine & Coach

¹ Exclude coaches added in the last 3 year and 19,980 for which upgradation has already been announced.

Indian Railways follows a well-structured schedule for the maintenance of its coaches, wagons, and locomotives to ensure safety, reliability, and operational efficiency. Maintenance activities include routine preventive inspections, cleaning, lubrication, minor repairs, and major periodic overhauls, while specialized maintenance is carried out for modern trains such as Vande Bharat, where components like traction systems, signalling equipment, HVAC, and coach interiors require expert handling. Traditionally, these activities have been performed in government-owned workshops and depots, which are equipped to manage both regular and periodic maintenance.

Despite this infrastructure, Railways faces resource constraints due to limited skilled manpower, capacity limitations at workshops, and the technical complexity of modern rolling stock. To address these challenges, Railways has increasingly adopted outsourcing as a strategic solution. Engaging private players enables Railways to leverage specialized expertise, adopt advanced technologies, and ensure faster turnaround times for coaches and locomotives, all while retaining ownership and operational control. This approach focuses on optimizing maintenance efficiency rather than privatizing assets.

Private sector participation can span multiple areas. Depot maintenance presents opportunities for private players to handle bogie overhauls, wheelset reconditioning, and refurbishment of coach interiors. Annual Maintenance Contracts (AMCs) allow private vendors or OEMs to provide end-to-end services for high-tech trains like Vande Bharat or MEMU/EMU trains. Public-Private Partnership (PPP) workshops enable private players to operate and manage maintenance depots while Railways provides infrastructure. Additionally, technology-driven maintenance, including IoT-enabled predictive maintenance, AI-based diagnostics, and energy-efficient retrofits, offers significant scope for private expertise. Component-level maintenance of systems such as braking units, traction motors, and HVAC equipment further broadens the avenues for private involvement.

By strategically outsourcing maintenance activities, Railways can efficiently meet the growing demands of its expanding and modernizing fleet. Private players bring technical know-how, operational efficiency, and advanced technology, which help improve service quality, reduce downtime, and ensure safety. This approach allows Railways to focus internal resources on core operations while leveraging private capabilities for specialized or high-volume maintenance tasks, creating a mutually beneficial arrangement that strengthens the overall maintenance ecosystem.

Government Budgetary Allocation to the Railway Sector

From FY 2021 to FY 2026, the union budget has significantly ramped up its allocation toward railway sector. The total outlay provided for Capital Expenditure in Budget Estimate 2025-26 of INR 2,652 Bn. The Gross Budgetary Support for Railways in FY 2025-26 stands at INR 2,520 Bn, which has reduced in compare of previous year, however the budget has significantly rise from the level of INR 1,122 Bn in FY 2021. The railway will continue to utilize the money in essential infrastructure projects like rail track expansion, rolling stock procurement, electrification, signalling improvements, and station modernisation. The Government also provided for INR 100 Bn from extra budgetary resource to meet its expenses & modernize. The total outlay also includes Nirbhaya fund of INR 2 Bn and INR 30 Bn for internal resources.

Indian Railways Budget Allocation for 2025-26: Focus on Customer Amenities and Rolling Stock

In the 2025-26 budget, Indian Railways has earmarked INR 121 Bn for customer amenities. This allocation is directed towards enhancing passenger comfort and convenience across various touchpoints of the railway network. Key investments include improved seating arrangements in coaches, enhanced sanitation facilities with bio-toilets, and upgraded waiting areas at stations equipped with comfortable seating and additional amenities. Furthermore, digital displays for real-time information on train schedules and platforms will be installed, alongside the development of mobile applications for ticket booking and service access. Provisions for differently abled passengers, such as designated seating areas and accessible toilets, as well as improved catering services offering a diverse menu, are also part of this comprehensive plan.

In addition to customer amenities, Indian Railways has allocated INR 589 Bn for rolling stock. This budget covers the procurement, manufacturing, furnishing, and refurbishment of coaches and locomotives. The rolling stock budget focuses on acquiring new coaches and locomotives, refurbishing, and upgrading existing rolling stock, enhancing the interior fittings of coaches to improve passenger comfort, and enhance number of tracks during FY 2025-26. Maintenance and repairs of rolling stock are also prioritized to ensure the operational efficiency and safety of trains.

Railways Infrastructure

During the financial year 2023–24, a total of 2,806 kilometers of new railway lines were completed, 259 kilometers of track were converted from meter/narrow gauge to broad gauge, and 2,244 kilometers of double or multiple lines were commissioned. The railway infrastructure further encompasses 13,523 passenger trains and 9,146 freight trains operating daily. As of March 2025, the Indian Railways recorded its highest-ever loading of 1,617.38 MT, showcasing the system's efficiency and capacity growth.

With approximately 7,335 railway stations spread across 17 zones and 68 divisions, India's railway network stands as a testament to its scale, efficiency, and crucial role in the nation's transportation landscape.

Railway modernization in India: focus on expansion / modernization of railway station network

As of July 8, 2025, the Ministry of Railways has entrusted the Rail Land Development Authority (RLDA) with the redevelopment of 90 railway stations across India. These projects are being executed under two primary models: EPC (Engineering, Procurement, and Construction) and PPP (Public- Private Partnership). Of the 90 stations, 82 are under the EPC model, while 8 are being considered under PPP, reflecting a strong preference for direct execution.

The Western Railway zone leads the redevelopment effort with the highest number of stations, followed by the Southern, Northern, and South-Central zones. In terms of state-wise distribution, Maharashtra tops the list with 16 stations, followed by Tamil Nadu (13), Gujarat (11), Delhi (9), and Uttar Pradesh (7). This pattern highlights a strategic focus on regions with high population density and economic significance.

Aligned with the overarching objectives of the "Digital India" initiative of the Government of India, Indian Railways has implemented Wi-Fi internet services at 6,102 stations through RailTel's RailWire Wi-Fi network, including 15 stations in the Kashmir valley. This initiative constitutes one of the world's largest and fastest public Wi-Fi networks. Notably, 70% of the commissioned stations are situated in rural areas, thereby providing free high-speed Wi-Fi access to a significant portion of the rural population.

Furthermore, RailTel is actively deploying an IP camera-based Video Surveillance System at over 5000 railway stations, significantly enhancing passenger safety and security across the Indian Railways network. This initiative includes the

integration of standalone video surveillance systems installed by respective zonal railways at various stations, enabling centralized monitoring of video recordings at the Divisional and Zonal headquarters. The system incorporates high-capacity storage devices at stations to archive CCTV footage for a specified duration. Phase-1 of this project has already been completed at 303 stations.

Indian Railways: Signalling

In the quest to enhance safety and efficiency in train operations, Indian Railways has embarked on a significant modernization journey, particularly in the domain of signalling systems. Over the past decade, Indian Railways has progressively replaced the outdated Multi Cabin Mechanical Signalling System with Modern Signalling Systems. These include Panel Interlocking (PI), Route Relay Interlocking (RRI), and Electronic Interlocking (EI), complemented by Multi Aspect Colour Light Signals (MACLS).

Source – Indian Railways

As of March 2024, 6,575 stations, which account for about 99.07% of interlocked Broad-Gauge stations, are equipped with these advanced systems. This transition has not only optimized operational costs but also enhanced safety by reducing human intervention.

In a pivotal move in 2016, Indian Railways decided to implement Electronic Interlocking in all future installations. By March 31, 2024, 3,424 stations had been outfitted with Electronic Interlocking Systems.

Track Circuiting and Block Proving by Axle Counter (BPAC):

Track circuiting, a vital component for ensuring track occupation verification, has also seen extensive implementation. By March 31, 2024, track circuiting was completed at about 35,743 locations across various routes, covering 99.39% of the 6,597 stations. Additionally, Block Proving by Axle Counter (BPAC) has been adopted to automatically verify the complete arrival of trains at stations, enhancing safety and improving mobility. As of the same date, BPAC was implemented on 6,058 block sections.

Intermediate and Automatic Block Signalling:

Intermediate Block Signalling (IBS) has proven instrumental in enhancing line capacity without incurring extra recurring revenue expenses. By March 31, 2024, IBS had been implemented in 756 block sections. Similarly, Automatic Block Signalling, which augments line capacity and reduces headway on high-density routes, has been provided on 4,431 route kms.

Enhancing Safety at Level Crossings & Self-Sufficiency in Signalling Equipment

Safety at level crossings has also been prioritized, with interlocking signals provided at 11,062 level crossing gates. Additionally, 7,667 busy interlocked gates have been equipped with Sliding Booms, minimizing disruptions caused by damage to level crossing gates.

To achieve self-sufficiency in signalling equipment, Indian Railways' workshops at various locations, including Podanur, Mettuguda, Gorakhpur, Howrah, Byculla, Sabarmati, Kharagpur, and Ghaziabad, manufacture specialized signalling items such as Electric Point Machines, Tokenless Block Instruments, Double Line Block Instruments, Axle Counters, and various types of relays. This initiative ensures a steady supply of essential components for smooth and safe train operations. The concerted efforts in modernizing signalling systems underscore Indian Railways' commitment to safety, efficiency, and technological advancement, marking a significant milestone in the history of railway growth and development.

For the development of railway infrastructure, Indian Railways allocated INR 41.9 billion for signalling works in FY 2023-24, emphasizing the railway's dedication to providing a safe and reliable travel experience.

Technology Development in Track & Signalling Infrastructure:***Emerging Smart Technologies & features in Railway Track & Management:***

Indian Railways has embarked on an extensive modernization of its track and signalling infrastructure to enhance safety, efficiency, and capacity. The shift from traditional mechanical signalling to advanced digital technologies has been a significant focus. The implementation of Electronic Interlocking (EI), Panel Interlocking (PI), and Route Relay Interlocking (RRI) systems now covers approximately 99.07% of interlocked Broad-Gauge stations. These systems provide more reliable and efficient control over train movements. Additionally, the widespread deployment of Track Circuiting and Block Proving by Axle Counter (BPAC) ensures accurate train detection, enhancing safety and operational efficiency.

Advanced Signalling Technologies

Indian Railways is integrating several advanced technologies to further improve signalling infrastructure. The European Train Control System (ETCS) is one such innovation, which enhances safety and punctuality by monitoring train speeds and ensuring they are within allowed limits. The Automatic Train Protection (ATP) system, known as Kavach, is another notable advancement. Kavach automatically applies brakes if the train driver fails to do so, particularly in adverse weather conditions. Since its national adoption in July 2020, Kavach has been deployed on 1,465 route kms and 139 locomotives, with ongoing projects aiming to cover approximately 3,000 kms.

In regions experiencing high rail traffic, such as Bengaluru, Automatic Block Signalling (ABS) systems are being introduced to increase train frequencies and reduce collision risks. Investments totalling INR 8.74 billion have been allocated for these projects, significantly improving the capacity and efficiency of key routes.

Centralized Traffic Control and Train Management Systems

Centralized Traffic Control (CTC) represents a major leap forward in signalling technology, enabling the management of multiple signalling installations from a centralized location. CTC systems, which include real-time simulation of railway traffic, have been operational on 322 route kms of the Aligarh- Kanpur route, with plans for expansion to about 14,660 route kms. Train Management Systems (TMS) complement CTC by providing real-time updates on train positions and movements, thus enhancing operational efficiency. Implementations in suburban sections of Mumbai and Howrah are already yielding improvements, with further installations planned for other critical routes.

Integration of Digital Technologies

The integration of digital technologies, such as the Real-Time Train Information System (RTIS) and Remote Monitoring and Management of Locomotive System (REMMLOT), is revolutionizing train operations. RTIS utilizes GPS sensors for real-time tracking of trains, which improves the accuracy of estimated times of arrival (ETAs) and integrates with passenger information systems to provide precise updates. RTIS is being deployed across 4,000 electric locomotives, significantly enhancing automated train management and charting.

REMMLOT, which incorporates GPS tracking and sensors into locomotives, enables continuous data monitoring and real-time adjustments. This system supports accurate train recording and operational efficiency. The Modern Train Control system, featuring LTE-based Mobile Train Radio Communication (MTRC), further enhances the signalling infrastructure, ensuring more reliable and efficient train operations.

These comprehensive modernization efforts, including advancements in signalling technologies and the integration of digital systems, are poised to transform Indian Railways into a more efficient, safe, and reliable transportation network. By embracing these technologies, Indian Railways not only improves safety and minimizes human error but also supports economic growth through a robust and modernized rail infrastructure.

Digital Transformation Initiatives in Railway:

Indian Railways is undergoing a significant digital transformation to modernize its operations and enhance service delivery. This shift is driven by the need to adapt to the digital economy and advancements in information and communication technologies (ICT). It is estimated that India plans to invest INR 50,000 million (equivalent to USD 715.41 billion) by 2030. Key elements of this transformation include the adoption of digital tools and systems that align with Industry 4.0 and Railway 4.0 principles.

Advanced Manufacturing and Infrastructure Maintenance

Indian Railways is embracing Industry 4.0 practices to boost productivity in its manufacturing processes, particularly in passenger car factories. The integration of advanced technologies such as drones and 3D scanning is revolutionizing infrastructure maintenance, including bridge inspections. These innovations reflect a commitment to utilizing cutting-edge solutions for enhanced safety and operational efficiency. Furthermore, the digitization of procurement procedures has streamlined processes from request processing and tender finalization to material assessment and online transactions, fostering greater transparency and efficiency.

Digital Ticketing and Passenger Experience Enhancements

The modernization of the Unreserved Ticketing System (UTS) is another significant development, facilitating automated ticketing at stations and improving passenger access while reducing wait times. This enhancement aligns with the broader digital transformation goals of Indian Railways, which aims to provide a seamless and user-friendly experience for passengers.

By integrating these advanced technologies and digital systems, Indian Railways is positioning itself at the forefront of modern transportation, ensuring greater efficiency, safety, and service quality across its network.

Integrated Tunnel Radio Communication System

Indian Railways is enhancing operational safety and communication in challenging terrains with the installation of the Integrated Tunnel Radio Communication System. RailTel is deploying this advanced system in critical railway tunnels to ensure uninterrupted radio communication between handheld radios within the tunnels, base stations in control rooms, and Station Masters at nearby stations. This system is pivotal in maintaining seamless train operations and ensuring safety in these crucial areas.

SMART Coaches and Technological Advancements

Indian Railways is revolutionizing passenger comfort and safety with the introduction of approximately 100 SMART Coaches. These coaches are equipped with modern features such as Smart Public Address and Passenger Information Systems, Smart HVAC (Heating, Ventilation, and Air Conditioning), and Smart Security and Surveillance Systems. This innovation underscores the commitment to enhancing the passenger experience through technology, including facial recognition, automated systems, and region-specific designs.

International Technology Integration and Startup Collaboration

Indian Railways is leveraging global technologies to modernize its operations. This includes adopting international best practices in areas like coach manufacturing, signalling, and freight management. The railway sector is also actively collaborating with startups and private enterprises to address challenges, enhance transit efficiency, and improve infrastructure. Policies support startups with seed funding and development resources, fostering innovation and driving a holistic transformation in Indian Railways through global technology integration and local entrepreneurial engagement. Overall, Indian Railways' digital transformation efforts are aimed at modernizing its infrastructure, optimizing operations, and enhancing the overall travel experience for passengers, positioning itself at the forefront of technological advancement in the global rail industry.

Competitive Scenario:

In India's evolving railway sector, the furnishing and refurbishing of passenger coaches play a crucial role in updating and maintaining the country's extensive rail infrastructure. This industry is predominantly led by large, established companies that possess the necessary resources, state-of-the-art technology, and extensive expertise to handle significant contracts. These industry leaders are responsible for transforming outdated coaches into modern, comfortable, and efficient units that meet stringent safety and quality standards. Their work involves not only the renovation of old coaches but also the furnishing of new ones, ensuring that each coach integrates the latest advancements in technology and design to enhance passenger experience and operational performance.

Entry Barriers:

- Entering this industry is no small feat, as it requires significant capital investment, advanced technical knowledge, and the ability to navigate complex regulatory approvals and certifications.
- New entrants have to build robust relationships with Indian Railways and establish a reliable supply chain for materials and components.
- The industry demands a high level of technical knowledge and expertise in both mechanical and electrical systems. Developing and maintaining this expertise requires skilled labor and ongoing training, which can be a barrier for new entrants.
- Existing players often have established connections and a proven track record, which new entrants must work to develop. Building strong relationships with Indian Railways and securing long-term contracts can be challenging.
- The Research Design and Standards Organization (RDSO) plays a crucial role as a technical consultancy in the Indian Railway, setting and validating standards for railway products through rigorous testing.
- Companies in the railway furnishing and refurbishing sector must adhere to strict regulations and quality standards established by Indian Railways. This includes obtaining certifications such as IRIS (International Railway Industry Standard).
- The process involves rigorous testing and validation to ensure that all products comply with safety and performance standards. Indian Railways conducts thorough inspections to ensure that all furnishing and refurbishing activities meet these high standards.
- New entrants face significant challenges in navigating these quality assurance processes, which demand detailed inspections, testing, and adherence to specific railway requirements.

Success in this field depends on a blend of technological innovation, rigorous quality compliance, and strong project management capabilities, making it both a challenging and rewarding industry for those who can successfully navigate its complexities. OUR PROCESS FOR TURNKEY FURNISHING AND REFURBISHMENT

Our process for Turnkey furnishing and refurbishment consists of following stages:

Project process steps

Step-1: Pre-qualification and Bid submission

A dedicated team reviews all tenders, assesses their viability based on our profile, and presents a shortlisted tender list to management for approval. Once approved, the list is forwarded to relevant departments like finance and procurement for necessary preparations. The dedicated tender department also evaluates eligibility criteria and considers joint ventures if needed, with management approval. The bid submission involves detailed financials, employee data, equipment, project portfolio, and legal aspects. The RFP document is reviewed, and the bid is submitted as per the requirement.

Step-2: Tender Management

The tender inviting authority reviews and evaluates all submitted bids for compliance with the tender requirements. Only the bids that meet the technical qualifications have their price bids opened. To ensure transparency, tenders are opened online, and the lowest bidder is identified.

Step-3: Award of Contract

Once the evaluation is complete, the customer awards the contract to the suitable bidder. This is typically communicated through a formal Letter of Acceptance or Purchase Order, which specifies a deadline for submitting the Performance Bank Guarantee (PBG). Upon submission of the PBG, both parties enter into a contract according to the terms and conditions outlined in the tender.

Step-4: Prototype Delivery & Approval

The company is required to deliver the prototype as per the contractual terms.

Step-5: Third party Inspection

Railway reserves the right to accept the bulk supply by its own inspection system or through third party inspection desired as per contract.

Step-6: Completion and Handover

The contract executing authority assigns coaches for work to begin. Upon completion of the contractual work, the work is considered completed.

Step-7: Completion of work

Upon completion of the work as per delivery terms, the appointed Railway Authorities certify the completed work and payment is processed as per PO terms.

power by making unilateral decisions about wages, benefits or other conditions of employment without consulting workers' representatives (if any).

The Act provides for the establishment of a code of minimum wages and other conditions of employment for workers in factories and commercial establishments that employs the workers. POSH (Prevention of Sexual Harassment) Act 2013

Women’s organisations and individuals advocating for women’s rights for decades have been trying to get legislation that can protect women’s rights enshrined in the Indian Constitution. In a patriarchal society like India, women’s rights need special protection; therefore, to protect women’s rights, various laws have been passed. One such piece of legislation is [the Sexual Harassment of Women at Workplace \(Prevention, Prohibition and Redressal\) Act of 2013](#). This legislation was introduced to protect women from the menace of sexual harassment at the workplace. A distinction has been made between sexual harassment and sex-based harassment. It stresses the fact that sexual harassment doesn’t always mean sexual desire; it can also be there to assert the power of one sex over the other (Sahgal & Dang 2017). Such behaviours and actions take a toll on a woman’s emotional health, hampering her personal and professional growth. Unequal power dynamics that are created because of the hierarchical structure of the workplace, when added to the gender power dynamics of a patriarchal society, cause the woman who is lower in rank in this hierarchical structure to suffer as she is made to choose between filing the complaint and keeping her job. The Act defines sexual harassment as any unwelcome act or behaviour of a sexual nature, whether verbal, physical, or visual, that is:

- A demand or request for sexual favours;
- A promise of preferential treatment in exchange for sexual favours;
- A threat of reprisal for refusing to submit to sexual advances; or
- Any other conduct of a sexual nature that is unwelcome.

c. Accounting Convention

The Restated Financial Information of the Company have been prepared under the historical cost convention, in accordance with generally accepted accounting principles in India (Indian GAAP) on an accrual basis. The Company has prepared these financial statements to comply in all material respects with the accounting standards notified under the Companies (Accounts) Rules, 2021, and the relevant provisions of the Companies Act, 2013, to the extent applicable and the guidance notes, standards issued by the Institute of Chartered Accountants of India. Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

d. Property, Plant and Equipments ('PPE') and Intangible Assets

PPEs are stated at actual cost, after reducing accumulated depreciation and impairment loss. Direct costs are capitalized until the assets are ready for use and include financing costs relating to any borrowing attributable to acquisition of construction of those assets which necessarily take a substantial period of time to get ready for their intended use. Capital work in progress includes the cost of PPEs that are not yet ready for their intended use.

Intangible assets, if any, are recorded at the consideration paid for acquisition of such assets and are carried at cost less accumulated amortization and impairment.

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in statement of profit and loss.

e. Depreciation, Amortisation and Impairment

Depreciation on PPE is determined based on the estimated useful life of the assets using the written down value method as prescribed under Schedule II to the Company Act, 2013. Individual assets costing less than Rs. 5000 are depreciated within a year of acquisition. Depreciation on assets purchased/sold during the period is proportionately charged.

Class of Assets	Estimated useful life (in Years)
Plant and Machinery	15
Computer and Server	3
Office Equipments	5
Vehicles	8
Furniture Fixture	10
Software and Licenses	3

Intangible assets are amortized over their useful life on a straight-line method.

An item of PPE is de-recognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising from the disposal or retirement of an item of PPE is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in the Statement of Profit and Loss.

The assets or group of assets (cash generating unit) are reviewed for impairment at each Balance Sheet date. In case of such any indication, the recoverable amount of these assets or group of assets is determined and if such recoverable amount of the assets or cash generating unit to which the assets belong is less than it's carrying amount, the impairment loss is recognized by writing down such assets to their recoverable amount.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows.

Under this method a projected accrued benefit is calculated at the beginning of the year and again at the end of the year for each benefit that will accrue for all active members of the plan. The projected accrued benefit is based on the plans accrual formula and service as of the beginning or end of the year, but using final compensation,

projected to the age at which the employee is assumed to exit. The plan liability is actuarial present value of the projected accrued benefits as on date of valuation.

BUSINESS OVERVIEW

We are engaged in the Indian railway rolling stock sector, focusing on the design, manufacture and warranty maintenance of railway coach interior. We provide turnkey furnishing solutions for the interiors of new railway coaches, refurbishment, upgradation and conversion of old coaches and up gradation of toilet facilities within railway coaches. Additionally we manufacture and supply components to Indian Railways. Our services and products are designed towards comfort, safety, hygiene and functionality in line with the specific requirements of Indian Railway and its affiliates.

Our sole proprietorship *M/S Acme India* began operation with the introduction of braille signage, for "*Divyangjan*" in the railway sector. Additionally, in 2016, we started doing business of fire-retardant epoxy flooring, which complied with EN-45545 standards for interior furnishings in Indian Railways. Since then, we have expanded our scope, initially focusing on manufacturing products for Indian railway coaches and later venturing into turnkey furnishing, refurbishment & up gradation of coaches and up gradation of toilets from 2017 onwards. We have footprints across 16 railway zones, 3 production units and 1 mid-life rehabilitation unit. We have successfully executed records of 24 different variants of coaches in Indian Railways.

In the turnkey furnishing of new railway coaches, we undertake the design and installation of interiors for various types of coaches. This includes different variants of Linke Hofmann Busch ("**LHB**") coaches, self-propelled units such as vande bharat, self-propelled inspection coaches and overhead equipment coaches like the diesel electric tower car. We execute these projects at all major railway production facilities, including the Modern Coach Factory ("**MCF**") in Raebareli, the Integral Coach Factory ("**ICF**") in Chennai, and the Rail Coach Factory ("**RCF**") in Kapurthala. Since 2017, we've successfully completed 28 projects of turnkey furnishing, delivering a total of 1,610 coaches.

In the refurbishment, up gradation and conversion of old railway coaches, we focus on both LHB and ICF coaches. Our refurbishment operations include interior designs & redesigns, replacement of worn-out components with new upgraded materials. The typical refurbishment cycle is 10-12 years (*Source: D&B Industry report*). Refurbishment of LHB and ICF coaches is carried out at designated railway workshops. Since securing our first up gradation contract in 2018, we have successfully refurbished and upgraded a total of 1,888 coaches till 31st of August 2025.

Our company specializes in the up-gradation and modernization of toilet facilities in railway coaches, both LHB and ICF. Till date, we have completed 10,948 units of toilet upgrades. These upgrades are designed to enhance hygiene, safety and passenger experience, aligning with the modernization efforts within the Indian Railways network.

As part of refurbishment projects, old components such as washbasins, fittings, panels, and other materials are not discarded but systematically removed and handed back to Indian Railways through their established channels, thereby supporting sustainable practices and minimizing environmental impact.

We are regular manufacturer and supplier of products such as Braille signage, Fibre reinforced plastic (FRP) products and sanitary ware made of aluminum polymer composite. We are regular supplier of products such as Epoxy flooring, decorative glass fabric reinforced plastic, toilet doors, intercommunication/Compartment doors, seat and berth, fire barrier decorative coating and hygiene related products such as Automatic Hygiene and Odor Control (AHOC), Soap dispenser, Automatic Odor Control (AOC) and vacuum circuit breakers. Union of India & Others.....Respondent

Case No.	Diary No. E-6799978/2025
Filed Under Section	Under Article 226 of The Constitution of India, 1950
Court/Authority	Before the Honorable High Court of Delhi at New Delhi
Case Details	<p>The Writ Petition (Civil) having Diary No. E-6799978/2025 has been filed by M/s Acme India (Proprietorship concern of Shri Suraj Prakash Pandey) before the Hon'ble High Court of Delhi under Article 226 of the Constitution of India, challenging the validity of the Show Cause Notice dated July 26, 2024 and the consequent Order-in-Original passed by the GST Department, raising a demand of Rs. 11,18,77,922/- for the period F.Y. 2017–18 to 2022–23. The impugned proceedings were initiated pursuant to an investigation carried out by GST Department, wherein it was alleged that the Petitioner had availed ineligible Input Tax Credit (ITC) on the strength of invoices issued by non-existent/fake firms. It was further alleged that M/s Acme India had fraudulently passed on or utilised such inadmissible ITC without any actual receipt of goods or services, in violation of Section 16(2)(b) of the CGST Act, 2017.</p> <p>The Petitioner has urged that no proper opportunity of personal hearing was granted before adjudication, which is in violation of Section 75(4) of the CGST Act, 2017 as well as the principles of natural justice. The Petitioner has also argued that the proceedings are vitiated by non-application of mind, as the Department mechanically relied upon investigation reports without conducting any independent verification of actual supply of goods or services. In addition, the demand raised has been described as arbitrary and excessive, ignoring the fact that the Petitioner has already made a voluntary deposit of Rs. 3,94,33,040/- during the course of investigation. The Petitioner has further emphasized that the Order-in-Original itself is illegible, unclear and incapable of proper appreciation, rendering it void and unenforceable in law.</p> <p>The Petitioner has accordingly prayed for quashing of the SCN dated July 26, 2024 and for setting aside of the demand of Rs. 11,18,77,922/- (less voluntary deposit), on the ground that the impugned proceedings are without jurisdiction, violative of principles of natural justice, and contrary to the provisions of the CGST Act, 2017.</p>
Amount involved	Rs. 11,18,77,922
Status	The matter is pending for adjudication.

The time duration from public Offer closure to listing continued to be three Working Days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public Issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public Issue closure to listing continues to be three Working Days during this phase.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Offer; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹24 per share, Offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Offer the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹22.00 in the above example. The Issuer, in consultation with the Book Running Lead Manager, may finalise the Offer Price at or below such Cut-Off Price, i.e., at or below ₹22.00. All Bids at or above this Offer are valid Bids and are considered for allocation in the respective categories.
